# Morningstar CFS FC Growth Active

**Research Pack** 

Preparation Date: 22/01/2024

### About this research pack

A research pack for financial advisers using the Morningstar CFS FC Growth Active Managed Account Portfolio. This pack shows analyst ratings and/or recommendations on the underlying portfolio holdings.

#### About Morningstar

Morningstar is a leading provider of asset allocation, portfolio construction and investment research services with over 35 years' experience in the United States, Australia and other international markets. Morningstar advises and manages funds for superannuation funds, institutions, platform distributors, financial advisers and individuals.

Morningstar's disciplined investment approach delivers objective, cost effective and holistic solutions for our clients - helping them reach their financial goals. This long-term, valuation driven approach is underpinned by an emphasis on preserving capital and undertaking comprehensive fundamental analysis of global asset classes and securities.

This document is issued by Morningstar Investment Management Australia Limited (ABN 54 071 808 501, AFS Licence No. 228986) ('Morningstar'). Morningstar is the Responsible Entity and issuer of interests in the Morningstar investment funds referred to in this report. © Copyright of this document is owned by Morningstar and any related bodies corporate that are involved in the document's creation. #### Morningstar Take by Morningstar Manager Research 30 Nov 2023

The Barrow Hanley Global Value Equity strategy retains our highest conviction for its disciplined execution of a well-established pragmatic value philosophy and process run by a best-in-class team. Strategy lead Brad Kinkelaar continues to run the portfolio assisted by three comanagers, TJ Carter, David Ganucheau, and Cory Martin who all have 19 plus years of experience. All members are well-versed in Barrow Hanley's approach to value investing and have spent considerable time working together. The highly regarded portfolio managers are supported by a well-resourced analyst network that scours the investable universe for opportunities. We like the collaborative culture, and sensible succession planning mitigates key-person risk. Robust bottom-up fundamental analysis underpins this strategy as the team seeks to identify companies with attractive valuations that other investors fail to recognise. Another appealing hallmark is the portfolio tilting between defensive value and cyclical value positions as the market evolves rather than being wedded to a single value substyle. Investors should note that portfolio rotation is an outcome of the bottom-up selection rather than an explicit macro call. Owing to the natural tilting of the portfolio, deep-value rallies may leave this strategy behind owing to the portfolio holding defensive value names as seen in 2016 and 2021. This process results in a diversified 50- to 70-stock portfolio with a true investor mindset; commensurately, active share is high and turnover low. The underlying strategy has been running since 2010 and has performed in line with the MSCI World Index and well ahead of most of its value peers, given its ability to tilt towards defensive value. This is a commendable long-term performance profile. Barrow Hanley's disciplined stock selection skills driving a dynamic weighting to defensive and cyclically oriented names continues to deliver through the cycle. This vehicle has been assigned a Morningstar Medalist Rating of Bronze as of date November 30, 2023. An analyst assessed the People, Process, and Parent Pillars of this strategy, and this vehicle inherited the analyst's views via StrategyID and AdvisorID.

#### Morningstar Take by Morningstar Manager Research 30 Nov 2023

Bentham Global Income stands out with its unique and broad approach, led by a highly skilled team, positioning it as an excellent choice for those seeking a higher-risk fixed-interest exposure. Bentham's investment team is relatively small locally but remains strongly led by managing director and portfolio manager Richard Quin, who continues at the helm alongside founding partners Nik Persic and Mark Fabry. The three senior members are supported by a dedicated team of eight with a blend of experience. This includes a mix of investment and data analysts, with three also sharing dealing duties. An arrangement with the former Credit Suisse Credit Investments Group now under the ownership of UBS also brings institutional-grade analysis for its largest allocations in high yield and loans. Bentham's focus is on identifying relative value across sectors and the capital structure, relying on both its top-down views and bottom-up research. Bentham seeks undervalued sectors and sectors where it is compensated for the risks. This has seen the manager make some significant shifts in credit sector and overall credit beta allocations over time, as well as changes in interest-rate positioning, which is reflective of the manager's high-conviction approach. To assist with this process, Bentham has invested heavily in visualization tools and other portfolio management systems. However, the manager continues to lack a dedicated risk oversight function, which is noteworthy given the growing allocations to derivatives in the portfolio. Bentham also tends to carry a higher credit allocation versus peers, which means the defensive characteristics of a typical bond fund aren't always present and thus can experience higher volatility at times. One of the attractive features of the strategy, however, is the capacity of portfolio hedges to provide some protection to returns in weaker markets. Unlike previous years where tail risk management was rewarded, the hedging book was a drag on performance over the 12 months to Sept. 30, 2023. While Bentham's 0.77% fee sits above peers, Bentham does manage across a broader global credit universe than most of its Morningstar Category peers, which requires

#### Morningstar Take by Morningstar Manager Research 30 Nov 2023

Colchester Global Bond remains a sound choice for global sovereign bond exposure. Colchester boasts a robust process and a well-credential and collegial team, although investors should be aware that this strategy is solely focused on sovereign bonds. Fixed-income veterans and Colchester co-founders lan Sims, Keith Lloyd, and Kathryn Elsby have worked together since 2000, leading an experienced investment team that exhibits low turnover. While the leaders have been in place long term, there is depth to the investment talent. The culture of the firm promotes probing enquiry and rational decision-making, which is important as their process leads to significant tilts away from the benchmark, the FTSE WGBI Index. Colchester applies a value-oriented philosophy to investing in government bonds and currencies. It is a clear, simple, and repeatable process centred on assessing value using proven economic frameworks: expected inflation-adjusted real return and purchasing power parity forecasts over the medium term. The team undertakes detailed country financial stability research and is one of a handful of sovereign bond managers that incorporates environmental, social, and governance factors into its process. Being prepared to back their research has resulted in significant underweightings in the major US and euro government-bond markets and a consequential significant overweighting in countries such as Malaysia, Columbia, and Mexico. The constraints in their process, including being sovereign-only, not being able to go short, and a cap on underweighting duration relative to the benchmark, led to slightly underwhelming performance in recent years. However the discipline of their approach paid dividends in calendar 2022 as the long-standing underweightings in European and US bonds drove strong outperformance against the FTSE WGBI Index. While higher-than-average fees on some of the strategy's share classes are a a headwind, for patient investors, Colchester remains a worthwhile option in the fixed-income space. The primary vehicle from which this strategy's pillar ratings are derived is Colchester Global Governement Bond A, ticker 40930 This vehicle has been assigned a

#### Morningstar Take by Morningstar Manager Research 30 Nov 2023

Fidelity Australian Equities cements its distinguished status with a 20-year track record from its esteemed manager applying an enduring quality-driven process. Paul Taylor has run the strategy uninterrupted since 2003. In January 2022 he was made head of investments at Fidelity Australia, although this additional role is not an impost on his time. Undoubtedly, he is the key architect behind the investment philosophy, process, and portfolio construction for the strategy, which has always presented significant key-person risk. The appointment of Justin Teo and Zara Lyons as assistant portfolio managers provides an opportunity for knowledge dissemination but is not viewed as succession planning. The investment process has remained broadly unchanged since 2003, seeking solid businesses with competitive advantages and promising industry dynamics that display attractive value, based on a longer-term normalized-earnings cycle. The differentiators that set Taylor apart from his rivals are the disciplined five- to seven-year focus on companies that have the potential to be structural winners and those showing an upside earnings or operating cash flow surprise. The final element bringing it all together is the measured conviction-based portfolio construction that prevents outsize mistakes. As the stocks' investment theses and earnings trajectory gains traction, the allocation increases commensurately. Domino's has been a prime example; it was initiated as a small position in 2007 and reached top-10 holding status over time before being sold in 2022. These portfolio management skills have been validated by the success achieved since its 2003 inception, where the portfolio has delivered alpha of almost 2% per year above the benchmark to August 2023. Overall, Fidelity Australian Equities is a rare strategy that has a skilled and tenured manager applying his quality-focused investment process with consistent execution, thus continuing to be viewed in the highest regard. The primary vehicle from which this strategy's pillar ratings are derived is Fidelity Australian Equities, ticker 12292. This vehicle has been assigned a Morningstar Medalist Rating of Bronze as of date November

#### Morningstar Take by Morningstar Manager Research 30 Nov 2023

FSI Australian Small Companies has an exceptional team and repeatable process that continue to earn our highest regard. Head of Australian small- and mid-cap companies Dawn Kanelleas has led this strategy since 2008. Kanelleas is capably supported by two long-standing portfolio managers in Michael Joukhador and Pavlos Totsis and assistant portfolio manager in Tahlia Gugusheff. The breadth and depth of analytical insights from this collegial unit are impressive, which further enhances the team-based approach here. Team stability also features, as Kanelleas, Joukhador, and Totsis have worked together for 14 years. This stability has aided in the consistent execution of their investment process, which is to find companies with durable competitive advantages. Under Kanelleas' tenure, there has been an increased focus on balance-sheet strengths and reliable cash flows, which is sensible given the higher inherent risks in small-cap companies. The fund has typically displayed a mild growth lean, though there's a healthy mix of names across the value-growth spectrum. This strategy's strong performance over the past several years has not gone unnoticed, with assets at AUD 1.4 billion as of June 2023. The team runs around AUD 3.7 billion in small caps (including its mid-cap and long-short strategies), easily one of the largest footprints in the cohort and making this strategy less nimble than peers. However, our concerns around capacity are partially assuaged by the strategy's liquidity considerations at the stock level, tendency to invest in more-liquid small-cap names, higher-than-average portfolio diversity (typically 40-60 names), and relatively low portfolio turnover. Nevertheless, capacity remains a watchpoint. Over the trailing 10 years to Oct. 30, 2023, the strategy has comfortably outperformed its Morningstar Category index and most peers. The final showpiece is the strategy's low annual management fee of 1.11%, with no performance fee, which is highly attractive compared with peers. All in all, FSI Australian Small Companies consistent investment process and its strong tenured team continue to warrant our highest conviction. The primary vehicle from which this

#### Morningstar Take by Morningstar Manager Research 30 Nov 2023

A great choice for investors seeking value and quality in Australian equities is Investors Mutual Australian Share. The retirement of Anton Tagliaferro, Investors Mutual Limited's founder and investment director on March 31, 2023, is significant and the end of an era for IML; however, we believe IML has handled the succession planning in a thoughtful and measured manner. Tagliaferro's transitioned his 25% portfolio management sleeve on this strategy to Daniel Moore, who now manages a 50% sleeve; the other 50% is managed by senior portfolio manager and head of research Hugh Giddy. The portfolio is in highly capable hands, with Moore and Giddy being experienced portfolio managers, previously running this strategy alongside Tagliaferro since 2013 and 2010, respectively. There are some holding disparities between the two portfolio managers given they approach each of their sleeves through a slightly different lens; however, the depth of research and investment insights have consistently been excellent over the years. The fundamental bottom-up value quality approach targets companies with competitive advantages and quality management, displaying steady, predictable earnings streams. Environmental, social, and governance issues have long been a mainstay of IML's approach, though recent enhancements have upweighted ESG in IML's proprietary quality scoring for individual stocks. IML's investment discipline is one of the strictest in the market, comprehensively assessing companies to ensure the resulting portfolio is low turnover and low volatility. Portfolio positions are determined both by price targets and the level of conviction in predicted future cash flows. The strategy's performance has been close to peers but behind the category index over the trailing 10 years to September 2023. The change of category from Australia large value to Australia large blend, a better reflection of its underlying portfolio on our metrics, has resulted in a lowering of the medal for the flagship vehicle given the different relativities among its new cohort, despite no changes to our pillar ratings. Regardless, we continue to have high regard for the team and view this strategy as

#### Morningstar Take by Morningstar Manager Research 30 Nov 2023

Despite distractions that have occurred across the broader business, we remain confident in Magellan Global Infrastructure's team and process. Gerald Stack helms the strategy and is an investor we hold in high regard. While key-person risk can't be discounted, we are pleased that Stack and his team have remained focused, committed, and relatively insulated from broader equity team changes. Stack is capably supported by portfolio managers Ofer Karliner, Ben McVicar, Jowell Amores, and David Costello in what is a relatively flat decision-making structure. This has resulted in a clearer line of long-term succession planning compared with the experience in global equities. With around AUD 16.6 billion in assets under management as at May 2023, the infrastructure team is an important part of Magellan Asset Management, ensuring the team remains well incentivized and motivated. Magellan Infrastructure targets a return of CPI+5% over the cycle, with lower drawdown risk to protect capital in adverse markets. To achieve this objective, Magellan's process is more conservative than some peers, with a strict definition of infrastructure. To be considered for inclusion, a company must possess an asset that is essential for the efficient functioning of society and have profits that aren't overly affected by competition, commodity prices, or sovereign risks. The risk-conscious attitude tends to lead to greater utilities allocations, though infrastructure allocations can rise should the view of economic conditions be bullish. This measured approach tends to deliver downside protection in market selloffs, but the strategy can lag during more cyclically driven markets. This was evident over 2022 and in 2023 when the absence of commodity price-sensitive stocks like oil and gas pipelines saw the strategy materially lag the category benchmark. Despite the risk of material short-term deviations from the benchmark, the process is well aligned to those investors who allocate to infrastructure for inflation and downside protection. Overall, we retain our conviction in Magellan Infrastructure's strong team and well-structured approach. The primary vehicle from which this strategy's pillar

#### Morningstar Take by Morningstar Manager Research 30 Nov 2023

A simple, commonsense approach and esteemed portfolio managers help MFS Global Equity retain Morningstar Analyst Ratings of Gold and Silver, depending on share class fees. Comanagers Roger Morley and Ryan McAllister deftly apply this strategy's long-standing approach. They invest in companies that can grow consistently over the long term thanks to their strong competitive advantages. Both are tenured: Morley has been a fine investor here for nearly 14 years, and McAllister became a comanager in 2016 and in the past seven years has steadily broadened his knowledge across industries and worked well with Morley. Further, the duo makes use of MFS' broader analyst team effectively; their long-term perspective and understanding of how the global research team's views on companies and industries have evolved engenders confidence in the strategy's research process and highlights the managers' laudably patient outlook. The methodical approach is straightforward, disciplined, and willing to depart from index weights. The strategy has long leaned toward industrials and healthcare at the expense of commodities and technology. That said, it hasn't all been smooth sailing. This strategy has encountered some stock-specific stumbles. The managers' valuation emphasis led them to own some companies facing more-concerted cyclical pressures than expected. While tension in balancing quality and value is inevitable, it's heartening that the strategy's more-borderline picks have generally been among its smaller positions-a tribute to sensible portfolio construction. The fastest-growing firms that have been among the fund's key missed opportunities at times have never been this strategy's calling card. The market's abandonment of high-flying growth stocks in 2022 was a reminder that styles can shift from favor, and the team has continued to identify plenty of longer-term winners in other industries. MFS also has a commendable history of putting clients first when it comes to managing capacity, and its fees are also advantageous. This remains an outstanding core option. This vehicle has been assigned a Morningstar Medalist Rating of Bronze as of date November 30, 2023. An analyst assessed

#### Morningstar Take by Morningstar Manager Research 30 Nov 2023

JOHCM Global Emerging Markets Opportunities (including Pendal Global Emerging Markets Opportunities) benefits from experienced managers and an established process. Our conviction in the process has increased, reflecting the differentiated top-down approach, which has added value from both top-down and bottom-up over the long run. Managers James Syme and Paul Wimborne have worked together since 2006 (first at Barings, then JOHCM since 2011). As a duo, they have therefore cemented a stable and established comanager structure. In January 2022, Ada Chan, who has been part of the team since 2016 as a dedicated senior analyst, was promoted to a fund manager. She had already been involved in bottom-up stock selection previously, so from then on, she became involved in portfolio construction and top-down as well. Unlike at many peers, the investment approach is driven by top-down analysis of the 26 countries making up the MSCI EM index. The managers continue to use the framework employed at their previous house, producing an overall score for each country and views on the attractiveness of various characteristics. At the stock level, the investment style is GARP, or growth at a reasonable price. Managers are evaluating stocks for their value and growth appeal through quant screening as well as company visits. Given the approach is GARP, the strategy should do well in most market environments. However, the team's strong valuation discipline means returns may lag in high-growth or momentum-driven/narrow markets, such as 2020 when the market was driven by a narrow group of stocks. In addition, large country bets can also affect the performance profile, both positively and negatively. For example, the underweight in China hurt relative returns in 2020 but was the key positive contributor in 2021. Since taking over the strategy in June 2011 to 31 January 2023, the clean A share class has been comfortably ahead of the MSCI EM index and peers. It is pleasing to see that both country allocation and stock selection have added value. Overall, we have increased our confidence in the strategy's pragmatic approach, which should help it to outperform over the cycle. The primary

#### Morningstar Take by Morningstar Manager Research 30 Nov 2023

PIMCO's Global Bond strategy is backed by three skilled managers who draw on the firm's extensive resources, and it benefits from a flexible, diversified approach, earning High ratings on both the People and Process Pillars. Lead manager Andrew Balls has two decades of experience running global and European mandates, and the vast investment team, including veteran comanagers Sachin Gupta and Lorenzo Pagani, is well-equipped to cover rates, currencies, corporates, and structured credit. Pimco's top-down views-driven by the firm's investment committee on which Balls sits-guide the strategy's broad positioning. Within the scope of those themes, Balls and his team consider relative valuations to determine sector, country, and yield-curve positioning. The setup resembles that of many of its global bond Morningstar Category peers, but the approach of this strategy also allows for considerable flexibility. The fund has historically held up to half of its assets in corporate bonds, and up to a third in emerging-markets debt; it can also invest up to 10% in below-investment-grade bonds. The team has used this latitude well and in moderation along with its work in developed market sovereign bonds, which typically anchor the portfolio. Andrew Balls has also tended to stay on the shorter side of the benchmark's duration, which held back returns in the fund's earlier history, but recently helped during periods of interest rate shocks (such as in the first guarter of 2021 and again in 2022). While the manager has recently reduced exposure to most credit-spread sectors, based on the group's overall recognition that markets lack visibility for the short and medium term, Pimco has demonstrated skill in corporate credit, securitized bonds, and currencies over long periods. These performance drivers remain key to the toolset here. Over the trailing three, five, and 10 years through September 2023, the fund's Institutional USD shares have largely outpaced both the category average and the benchmark index, while keeping volatility in check. All told, this team is well-equipped to take advantage of the strategy's flexibility over the long haul. This vehicle has been assigned a Morningstar

#### Morningstar Take by Morningstar Manager Research 30 Nov 2023

Highly experienced and perceptive portfolio managers combine with a sturdy investment process to ensure we maintain our highest conviction in Resolution Capital Global Property Securities. Resolution utilizes a multi-portfolio-manager approach, to mitigate key-person risk and provide rigorous diversity of opinion on stock selection and portfolio construction. The four portfolio managers are CIO Andrew Parsons, Marco Colantonio, Robert Promisel (New York-based), and Julian Campbell, each taking responsibility for investing approximately 25% of total funds under management. The insightful portfolio managers are supported by a well-resourced team of five investment analysts, a trader, an ESG analyst, and two quantitative analysts, representing one of the larger property teams in the Australian market. In addition, Resolution's broader investment team includes a six-person global listed infrastructure team (three portfolio managers and three analysts). The investment process is based on three key principles: an understanding that real estate is cyclical and capital-intensive; a focus on the underlying real estate asset; and avoiding permanent impairment of capital when investing. Critically, the team uses detailed fundamental analysis combined with a top-down overlay, reflecting the dynamics of various real estate markets, to search for investable property companies and trusts that operate in high-barrier-to-entry markets where landlords have pricing power and have a high level of recurring earnings, low debt, and strong stewardship. The resulting 40- to 60-stock portfolio is concentrated and benchmark-unaware but diversified across sectors and regions. The strategy over the 10 years to June 30, 2023, has outperformed the index. However, being a high-conviction strategy, returns can be volatile against the index in the short term. Undoubtedly, Resolution has a sizable asset base, but to the team's credit it has predominantly stuck to highly liquid stocks and adopts reasonably prudent capacity management. Resolution Capital Global Property Securities is an excellent option for long-term investors seeking global property exposure. The strategy comes in several share

Morningstar Take by Morningstar Manager	Performance 3									
Research 30 Nov 2023 Schroder Australian Equity has some notable qualities that continue to warrant our highest conviction. The conscientious leadership of a skilled team and the diligent application of a time-tested process align with key elements of the Morningstar Medalist Rating process. Head of Australian equities Martin Conlon has managed this fund since 2003, after joining	2019	2020		2021	2022		14.5	Growth of - Fund \$15,495 - Market Inc \$15,704 - Category \$15,320 Annual		
Schroders in 1994, while deputy head of equities Andrew Fleming has been with Schroders since 2007 and has 30 years of investing experience. Conlon and Fleming are especially thoughtful in researching companies and understanding the economic backdrop	21.95 0.00 21.95 NAv	-1.40 0.00 -1.40 NAv		17.65 0.00 17.65 NAv	4.19 0.00 4.19 NAv	9.69 0.00 9.69 NAv	NAv NAv NAv NAv	Total Retur Income Re Growth Re Tax-Adj Re	turn % turn %	
when building the portfolio. In addition, the broader investment team is knowledgeable and perceptive. Turnover for the team has been elevated over the past three years, with 2023 seeing the departures of portfolio managers Joseph Koh and Ray David. That said, the team remains well-resourced, with Ben Chan and Adam Alexander proving credible additions to the team, having joined in 2022. Schroders' investment process involves detailed fundamental bottom-up company assessments to gain an understanding of quality and value. The primary focus of the research is appraising a company's pricing power, long-term sustainability, and midcycle earnings. We appreciate the team's assiduous application of the repeatable investment process. In addition, we applaud the team's multiple-perspectives approach when scrutinizing company risks, including environmental, social, and governance issues and thematic influences. The resulting benchmark-aware portfolio of around 40-70 stocks is long-term, balanced, and value-tilted. The strategy has recovered from its	Trailing6 MtQuartileImage: Constraint of the second sec	9 9.69 0 0.00 9 9.69 v NAv 7 12.42 6 11.34 00 TR AUD 00 TR AUD 00 TR AUD	3 Yr 10.37 0.00 10.37 NAv 9.24 9.12 esstic Eq Equity ed Proper sted Proper fixed Int	uity rty perty iterest	10 Yr 7.42 0.00 7.42 NAv 7.93 7.14 % Assets 88.50 6.89 3.02 0.00 0.00 0.00 0.00	3-Year Risk Measur Standard Deviation Sharpe Ratio R-Squared Beta Alpha Morningstar Style I Equity Value Blend Growt Berg Dig U U U U U U U U U U U U U U U U U U U	10.76 0.80 94.42 0.78 2.48	11.51 0.64 93.89 0.83	Inde: 13.5( 0.55 - - -	
underperformance against the index between 2018 to 2020, with decent outperformance over the past three years to September 2023. In addition to its competitive fee, Schroders' strong qualities increase our confidence in the manager's outperformance over the long term, thus warranting a core position in investors' portfolios. The primary vehicle from which this strategy's pillar ratings are derived is Schroder WS Australian Equity WC, ticker 8847. Morningstar Take by Morningstar Manager Research 30 Nov 2023

T. Rowe Price Global Equity remains a strong option for investors seeking fundamental exposure to growth-style equities despite near-term headwinds to performance. We maintain a very high regard for portfolio manager Scott Berg, who has led this strategy since 2012 (and a similar vehicle since 2008). Based in Baltimore, Berg is deeply passionate about investing and consistently exhibits unique and thoughtful insights that set him apart from the competition. While there is some key-man risk, Berg has had a long and successful association with T. Rowe spanning over two decades. His process is highly dependent on leveraging the vast analytical resources provided by the firm. Indeed, with around 200 equity research analysts organized along sector and regional lines, few can match the fundamental analytical firepower of T. Rowe Price on a global scale. He is supported by a London-based team analyst, but ultimately Berg is the sole decision-maker. The strategy's investment process seeks stocks with underappreciated growth potential across both developed and emerging markets. the strategy can also invest in private-market opportunities. For example, it invested in Rivian Automotive prior to its IPO. The portfolio typically trades at higher valuation multiples than both the benchmark and Morningstar Category peer group, but it is highly diversified (ranging from 160 to 235 holdings over the past five years). While Berg takes a long-term, fundamental view, he is also pragmatic when it comes to changes in prevailing conditions. This can result in relatively high portfolio turnover, upward of 80% at times. Calendar-year 2022 was a challenging period for the strategy, with growth stocks experiencing a broad-based derating on the back of inflation and interest-rate fears. In this environment, Berg has rotated from high-growth to core-growth, reducing technology exposure and increasing weightings to financials, materials, and industrials, but not before experiencing significant underperformance relative to the benchmark. Despite these headwinds, we remain confident Berg will deliver over the full cycle and continue to regard this strategy as among the best options for growth-seeking

#### Morningstar Take by Morningstar Manager Research 30 Nov 2023

A topnotch team and straightforward process make Western Asset Australian Bond a great choice for domestic fixed-income exposure. Anthony Kirkham, head of investment/portfolio manager, is the lead portfolio manager of this strategy, and we have high regard for his investment knowledge and skills. Kirkham is supported by an experienced investment team, consisting of Craig Jendra and Damon Shinnick, co-portfolio managers, and Sean Rogan, research analyst. Drawing on Western Asset's global resources, macroeconomic views are set initially by the firm's global investment strategy committee. Kirkham, Jendra, and Shinnick then collaborate and express shrewd domestic perspectives from these global views, as well as meticulous credit analysis at the sector and issuer levels. The stability of this group and quality of the research are impressive. There's appeal to the strategy's simplistic and relatively conservative investment process, which seeks mispriced domestic fixed-interest securities within various sectors. Sector and issuer limits are applied to help damp the portfolio's volatility in different environments. Still, sector allocation and issuer selection has been strong over long horizons, emphasising the team's rigourous analysis in these areas. That said, the long-standing overweighting in credit relative to the benchmark caused the most pain in 2022 as swap and credit spreads widened. While the portfolio's active duration has been moved around judiciously over the years, the plus or minus 1.0 year range keeps duration close to the index. This can be a hindrance if interest rates rise unexpectedly as they have since mid-2022. Notwithstanding the short-term underperformance, the strength and consistency of the strategy's long term track record against the Morningstar Category index and average provide comfort, and the 0.42% annual fee is competitive relative to peers. All in all, Western Asset Australian Bond remains a strong domestic fixed-income strategy thanks to its best-in-class team and simple investment process. This vehicle has been assigned a Morningstar Medalist Rating of Bronze as of date November 30, 2023. An analyst assessed the People, Process,

### **Managed Fund Investment Detail Disclosure Statement - Advanced**

#### Quick Stats

Morningstar Category  $^{\mathrm{\tiny M}}$ 

Based on exposure to asset classes, investment sectors, the investment style and market-cap allocation, and the associated risk and return characteristics of funds. The objective of the classification system is to provide groupings of funds which can be reasonably considered to be close investment alternatives and for which performance and other statistics such as fees are comparable.

#### Morningstar Medalist Rating ™

Is the summary expression of Morningstar's forward-looking analysis of investment strategies as offered via specific vehicles using a rating scale of Gold, Silver, Bronze, Neutral, and Negative. The Medalist Ratings indicate which investments Morningstar believes are likely to outperform a relevant index or peer group average on a risk-adjusted basis over time. Investment products are evaluated on three key pillars (People, Parent, and Process) which, when coupled with a fee assessment, forms the basis for Morningstar's conviction in those products' investment merits and determines the Medalist Rating they're assigned. Pillar ratings take the form of Low, Below Average, Average, Above Average, and High. Pillars may be evaluated via an analyst's qualitative assessment (either directly to a vehicle the analyst covers or indirectly when the pillar ratings of a covered vehicle are mapped to a related uncovered vehicle) or using algorithmic techniques. Vehicles are sorted by their expected performance into rating groups defined by their Morningstar Category and their active or passive status. When analysts directly cover a vehicle, they assign the three pillar ratings based on their qualitative assessment, subject to the oversight of the Analyst Rating Committee, and monitor and reevaluate them at least every 14 months. When the vehicles are covered either indirectly by analysts or by algorithm, the ratings are assigned monthly. For more detailed information about the Medalist Ratings, including their methodology, please go to the Section titled "Methodology Documents and Disclosures"

https://shareholders.morningstar.com/investorrelations/governance/Compliance--Disclosure/default.aspx

% Data Coverage: the level of data completeness used to generate the overall rating. If the pillar is assigned directly or indirectly by analysts (pillar inheritance), the pillar will have complete data (i.e. 100%). If the pillar is assigned by machine learning algorithm, Morningstar counts the number of data points feeding both the positive and negative models and counts whether the vehicle has strategy-specific data available. A percentage is calculated per pillar. The overall % data coverage is then scaled by pillar weights. Morningstar will not produce a Medalist Rating with less than 80% data availability for algorithmically assigned pillar assessments.

Analyst-Driven Proportion: displays the weighted percentage of a vehicle's pillar ratings assigned directly or indirectly by analysts (pillar inheritance). For example, if the Parent and Process ratings are assigned directly or indirectly by analysts but the Process rating is assigned algorithmically, the Analyst-Driven Proportion for an actively managed vehicle would disclose that 55% of the pillar weight was assigned by analysts. In the case of a passively managed vehicle the Analyst-Driven Proportion would disclose that 90% of the pillar weight was assigned by analysts.

Morningstar Pillars: The three Medalist Rating assessment pillars - People, Parent and Process - may be evaluated via an analyst's qualitative assessment (either directly to a vehicle the analyst covers or indirectly when the pillar ratings of a covered vehicle are mapped to a related uncovered vehicle) or using Morningstar's machine learning algorithm. Pillar ratings take the form of Low, Below Average, Average, Above Average, and High. Pillars evaluated with Morningstar's machine learning algorithm are displayed with "Q" behind the Pillar name.

#### Morningstar Rating <sup>™</sup>

The rating is calculated for funds with at least a three-year

history based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance. The top 10% of funds in each peer group receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. The peer group is determined by the fund's Morningstar Category and Legal Type. The Overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its three-, five- and ten-year Morningstar Rating metrics.

#### Morningstar Take

The Morningstar Take is a summary of Morningstar's overall opinion of the fund manager's strategy and capabilities in the asset class. If Morningstar has not qualitatively reviewed the manager, the PDS Objective and Fund Investment Strategy will appear in its place.

#### Performance

The performance data given represents past performance and should not be considered indicative of future results. Principal value and investment return will fluctuate, so that an investor's shares when redeemed may be worth more or less than the original investment.

Growth of \$10,000: The graph compares the growth of \$10,000 in a fund with that of a capital market index chosen by Morningstar and with that of the average growth for all funds in its Morningstar peer group. The index is an unmanaged portfolio of specified securities. The index and the category average do not reflect any initial expenses however the category average returns are net of ongoing fees. A fund's portfolio may differ significantly from the securities in the index.

*Quartile Rank:* The graph represents the fund's total return percentile rank among funds in the same peer group. The black bar on the graph represents the quartile in which the fund-performance ranking falls. If the top quarter of the graph is shaded, for example, the fund performed among the top 25% of its category that year.

Total return reflects performance without adjusting for sales charges but is adjusted to reflect all actual ongoing fund expenses and assumes reinvestment of distributions. Growth return is the percentage change in the scheme's soft close exit price adjusted for any capital re-organisation. Income return is the total return less growth return and reflects the level of distributions from a fund. For Australian funds, performance is not adjusted for taxation. For New Zealand PIE funds, tax credits are added back to the performance. For New Zealand non-PIE funds returns are calculated net of tax. Trailing returns for periods over one year are annualised.

#### **Risk Measures**

*Standard deviation*: Statistical measure of the volatility of the fund's return.

Sharpe ratio: A risk-adjusted measure calculated by using standard deviation and excess return to determine reward per unit of risk. The higher the Sharpe Ratio, the better the fund's historical risk-adjusted performance.

Alpha: A measure of the difference between a portfolio's actual returns and its expected performance, given its level of risk as measured by beta. A positive Alpha figure indicates the portfolio has performed better than its beta would predict.

*Beta*: A measure of a fund's sensitive to market movements. If beta is greater than one, movements in value of the fund that are associated with movements in the value of the benchmark tend to be amplified.

*R-Squared*: : Measures the relationship between a portfolio and its benchmark. It can be thought of as a percentage from 1 to 100. R-squared can be used to ascertain the significance of a particular beta or alpha. Generally, a higher R-squared will indicate a more useful beta figure.

#### Fees

Total Cost Ratio (Prospective): Represents the

forward-looking figure encompassing the total non-discretionary fees and costs associated with managing and administering collective investment products.

*Buy-Spread/Sell-Spread:* A transaction cost incurred by the investor that reflects an estimated transaction costs incurred by the fund in dealing with the underlying securities as shown in the PDS.

Performance Fee Costs: Performance Fee shown in the "Fees and Costs Summary" table in the PDS. It is intended as a representation of potential on-going performance fee expenses and is a calculated average using the performance fee costs from the last five financial years (or as many as the performance fee was applicable). This amount includes the Performance Fee costs arising from Interposed Vehicles.

Investment Management Fee: The Management Fee (MIS) and Investment Fees (Super) shown in the PDS, that is attributable to investment management, which are fees and costs an investor would expect to be charged over the year. This excludes the costs arising from interposed vehicles.

Administration Fees and Costs (Super Funds only): shown in the "Fees and Costs Summary" table in the PDS. This includes OTC Derivative Costs deemed to be Administration costs.

#### Portfolio

*Composition:* The graph represents a breakdown of the fund's holdings into general investment classes based on surveyed data provided by the fund manager.

Morningstar Style Box: For equity funds the vertical axis shows the market capitalization of the stocks owned and the horizontal axis shows investment style (value, blend or growth). For fixed-income funds the vertical axis shows the average credit quality of the bonds owned, and the horizontal axis shows interest rate sensitive as measured by a bond's duration (short, intermediate or long).

*Top Holdings:* The largest exposure of eligible securities within a fund's portfolio. Portfolio holdings information is based on the most recent information available to Morningstar, and eligible securities are defined by Morningstar's Global Methodology team, and will exclude positions not considered core to the portfolio.

*Top 5 Sector Weightings:* The Morningstar sector structure divides the stock universe into 129 industries ranging from semiconductors to medical equipment. These industries are classified into 41 industry groups, which are then used to construct 12 separate sectors.

*Top 5 Countries*: The largest geographical exposure of a fund's stock assets. Country assignments are based on the primary exchange where each stock is traded.

#### Operations

*Minimum Initial Investment:* The smallest investment amount accepted by the product to establish a new account.

*Minimum Additional Investment:* The amount required to make subsequent investments in the product.

*Minimum Withdrawal:* The smallest amount that can be taken out of the product at one time.

*Switching Allowed:* If it's possible to switch between investments in the same offer document.

Distributions Frequency: The number of times per year a fund intends to distribute for the life of the offer document.
