Morningstar Take by Morningstar Manager
 Research 31 Jul 2024

The Barrow Hanley Global Value Equity strategy possesses attributes that continue to deserve our highest conviction. We have high regard for both its time-tested and disciplined approach to pragmatic value investing and its tenured, high caliber team that has executed it in an unwavering fashion. Strategy lead Brad Kinkelaar continues to manage the portfolio, assisted by comanagers David Ganucheau and Cory Martin, who have 19-plus years of experience. The departure of portfolio manager TJ Carter in May 2023 was the only voluntary turnover within the team in decades, a clear indication of the firm's strong culture. The team members are well-versed in Barrow Hanley's approach to value investing and have spent considerable time working together. The highly regarded portfolio managers are supported by a well-resourced analyst network that scours the investable universe for opportunities. We like the collaborative culture, and sensible succession planning mitigates key-person risk. Robust bottom-up fundamental analysis underpins this strategy as the team seeks to identify companies with attractive valuations that other investors fail to recognize. Another appealing hallmark is the portfolio tilting between defensive value and cyclical value positions as the market evolves, rather than being wedded to a single value substyle. Investors should note that the portfolio tilting is an outcome of the bottom-up selection rather than an explicit macro call. Owing to the natural tilting of the portfolio, deep-value rallies may leave this strategy behind because the portfolio holding measured allocations in both defensive and cyclical value names. This process results in a diversified 50- to 70-stock portfolio with a true investor mindset; commensurately, active share is high and turnover low. The underlying strategy has been running since 2010 and has performed well ahead of the MSCI World Value Index and well ahead of most of its value peers, given its ability to avoid the risks in deep-value stocks. This is a commendable long-term performance profile. The attributes of the Barrow Hanley Global Value Equity make it an ideal candidate for investors seeking a value-oriented exposure

Morningstar Take by Morningstar Manager

Research 31 Jul 2024

Bentham Global Income stands out with its unique and broad approach, led by a highly skilled team, positioning it as an excellent choice for those seeking a higher-risk fixed-interest exposure. Bentham's investment team is relatively small locally but remains strongly led by managing director and portfolio manager Richard Quin, who continues at the helm alongside founding partners Nik Persic and Mark Fabry. The three senior members are supported by a dedicated team of eight with a blend of experience. This includes a mix of investment and data analysts, with three also sharing dealing duties. An arrangement with the former Credit Suisse Credit Investments Group now under the ownership of UBS also brings institutional-grade analysis for its largest allocations in high yield and loans. Bentham's focus is on identifying relative value across sectors and the capital structure, relying on both its top-down views and bottom-up research. Bentham seeks undervalued sectors and sectors where it is compensated for the risks. This has seen the manager make some significant shifts in credit sector and overall credit beta allocations over time, as well as changes in interest-rate positioning, which is reflective of the manager's high-conviction approach. To assist with this process, Bentham has invested heavily in visualization tools and other portfolio management systems. However, the manager continues to lack a dedicated risk oversight function, which is noteworthy given the growing allocations to derivatives in the portfolio. Bentham also tends to carry a higher credit allocation versus peers, which means the defensive characteristics of a typical bond fund aren't always present and thus can experience higher volatility at times. One of the attractive features of the strategy, however, is the capacity of portfolio hedges to provide some protection to returns in weaker markets. Unlike previous years where tail risk management was rewarded, the hedging book was a drag on performance over the 12 months to Sept. 30, 2023. While Bentham's 0.77% fee sits above peers, Bentham does manage across a broader global credit universe than most of its Morningstar Category peers, which requires

Morningstar Take by Kongkon Gogoi 20 Dec 2023

CFS Index Global Shares is a sound choice to gain global equities exposure at a reasonable price. This fund offers a sensible way to invest in global equities, as many active strategies generally struggle to deliver better risk-adjusted performance in this segment. This strategy's approach boasts the right blend of the index, a strong underlying index tracker, and cost. While these three features earn our conviction, we view the strategy's execution as less efficient than its peers. The target index, MSCI All Country World Ex Australia Equities Index, is synonymous with global equity market exposure. The index provides very efficient access to a broad portfolio of giant- to large-cap stocks from 22 developed- and 24 emerging-markets economies. This index is a high hurdle for active managers to beat in the global equity market segment. The underlying outsourced manager, State Street Global Advisors, is a robust index-tracker, which bodes well for the strategy. However, CFS' contribution in the process, where it executes the critical function of cash management, lacks the execution prowess of better-rated peers. While the highly rated peers of CFS have consistently delivered added performance over the index on an annual basis, aided by the tax withholding benefits received for investing in global equities, CFS Index Global Shares lacks that consistency. In our view, this owes to CFS' cash management not being at the same level as its passive peers. The strategy's investment process does not inspire the same conviction we have bestowed upon its competitors, tracking a similar broad-based index. The recent personnel turnover in the team, which began with the departures of Scott Tully and Peter Dymond, the erstwhile CEO and head of portfolio management, respectively, has now largely settled. Following key departures, under the guidance of the new CIO, Jonathan Armitage, the team has expanded and restructured, notably with the creation of a cash management and derivatives unit led by industry veteran John Iles. It is indeed encouraging to witness CFS' commitment to addressing our concerns regarding cash management inefficiencies. The CFS team restructuring appears

to be a positive step forward; however, given the recent nature of these changes, with some adjustments still in progress, we remain vigilant to allow sufficient time to gauge the full impact of these changes before our conviction level is strengthened. Nevertheless, the strategy still has some appealing features that support its investment merit case. The presence of a well-representative underlying index, a strong index-tracking manager, and a reasonable fee make the strategy a viable option for global equities exposure. The primary vehicle from which this strategy's pillar ratings are derived is CFS Wholesale Index Global Share, ticker:11333.

Morningstar Take by Morningstar Manager
 Research 31 Jul 2024

Fidelity Australian Equities cements its distinguished status with a 20-year track record from its esteemed manager applying an enduring quality-driven process. Paul Taylor has run the strategy uninterrupted since 2003. In January 2022 he was made head of investments at Fidelity Australia, although this additional role is not an impost on his time. Undoubtedly, he is the key architect behind the investment philosophy, process, and portfolio construction for the strategy, which has always presented significant key-person risk. The appointment of Justin Teo and Zara Lyons as assistant portfolio managers provides an opportunity for knowledge dissemination but is not viewed as succession planning. The investment process has remained broadly unchanged since 2003, seeking solid businesses with competitive advantages and promising industry dynamics that display attractive value, based on a longer-term normalized-earnings cycle. The differentiators that set Taylor apart from his rivals are the disciplined five- to seven-year focus on companies that have the potential to be structural winners and those showing an upside earnings or operating cash flow surprise. The final element bringing it all together is the measured conviction-based portfolio construction that prevents outside mistakes. As the stocks' investment theses and earnings trajectory gains traction, the allocation increases commensurately. Domino's has been a prime example; it was initiated as a small position in 2007 and reached top-10 holding status over time before being sold in 2022. These portfolio management skills have been validated by the success achieved since its 2003 inception, where the portfolio has delivered alpha of almost 2% per year above the benchmark to August 2023. Overall, Fidelity Australian Equities is a rare strategy that has a skilled and tenured manager applying his quality-focused investment process with consistent execution, thus continuing to be viewed in the highest regard. The primary vehicle from which this strategy's pillar ratings are derived is Fidelity Australian Equities, ticker 12292. This vehicle has been assigned a Morningstar Medalist Rating of Bronze as of date July

Morningstar Take by Morningstar Manager
 Research 31 Jul 2024

GQG Partners Global Quality Equity (named GQG Partners Global Equity outside the US) succeeds with a talented manager, a robust analyst staff, and a highly original approach. Lead manager Rajiv Jain has racked up an impressive record running several funds during long tenures at previous employer Vontobel and at GQG, which he co-founded in 2016. This global strategy, launched in Australia in June 2017 and in the US in late March 2019, has flourished. Its results were especially noteworthy in 2022's dismal market conditions and in early 2024. (Its strong gains in 2023 didn't stand out in a powerful broad market rally.) The institutional shares of the US-domiciled fund lost only 3.7% in 2022, while the strategy's MSCI All Country World Index benchmark dropped 18.4% and the global large-stock growth Morningstar Category (for US-based fund) plunged 27.9%. In the first four months of 2024, the US institutional shares soared 13.7%, far above the category average (which rose 4.5%) and the benchmark (up 4.6%). Jain and his colleagues achieved these results by heavily weighting stocks common in other portfolios—such as recent top-10 holdings Meta Platforms, Alphabet, and Novo Nordisk—while also profiting immensely from lesser-known stocks such as AppLovin and subsidiaries of the India-based conglomerate Adani. In addition, Jain is exceptionally willing to make unorthodox moves and shift direction decisively. For example, at the end of 2021, Meta was absent from the portfolio; two years later, it was the number-one holding at nearly 8% of assets. At a sector level, the portfolio held no energy stocks at all in 2020 but stashed more than 20% of assets there throughout 2022. Meanwhile, Adani had been the target of a scathing short-seller's report that had sent most investors scurrying. Jain and team investigated, decided the criticism was overblown, and picked up shares that had declined sharply in price. The stock soon shot upward. Decisive shifts of sector and bold moves into controversial stocks can easily backfire. But Jain has taken such steps before—though not as frequently—and has proven his abilities over more than two decades. This offering isn't for the meek but holds

Morningstar Take by Morningstar Manager
 Research 31 Jul 2024

A great choice for investors seeking value and quality in Australian equities is Investors Mutual Australian Share. The retirement of Anton Tagliaferro, Investors Mutual Limited's founder and investment director on March 31, 2023, is significant and the end of an era for IML; however, we believe IML has handled the succession planning in a thoughtful and measured manner. Tagliaferro's transitioned his 25% portfolio management sleeve on this strategy to Daniel Moore, who now manages a 50% sleeve; the other 50% is managed by senior portfolio manager and head of research Hugh Giddy. The portfolio is in highly capable hands, with Moore and Giddy being experienced portfolio managers, previously running this strategy alongside Tagliaferro since 2013 and 2010, respectively. There are some holding disparities between the two portfolio managers given they approach each of their sleeves through a slightly different lens; however, the depth of research and investment insights have consistently been excellent over the years. The fundamental bottom-up value quality approach targets companies with competitive advantages and quality management, displaying steady, predictable earnings streams. Environmental, social, and governance issues have long been a mainstay of IML's approach, though recent enhancements have upweighted ESG in IML's proprietary quality scoring for individual stocks. IML's investment discipline is one of the strictest in the market, comprehensively assessing companies to ensure the resulting portfolio is low turnover and low volatility. Portfolio positions are determined both by price targets and the level of conviction in predicted future cash flows. The strategy's performance has been close to peers but behind the category index over the trailing 10 years to September 2023. The change of category from Australia large value to Australia large blend, a better reflection of its underlying portfolio on our metrics, has resulted in a lowering of the medal for the flagship vehicle given the different relativities among its new cohort, despite no changes to our pillar ratings. Regardless, we continue to have high regard for the team and view this strategy as

Morningstar Take by Morningstar Manager

Research 31 Jul 2024

Janus Henderson Tactical Income utilizes the manager's value-oriented process in a more flexible absolute-return-oriented manner, through a stable and experienced team. Its leader Jay Sivapalan has been with the firm for more than two decades and has been able to rebuild a flat and cohesive team culture since he assumed lead responsibility five years ago. While Sivapalan remains the key individual, he is well supported by Shan Kwee, who continues to impress with his growing leadership and oversight of credit, alleviating some of the key-person risk. In April 2023, Emma Lawson was hired as an investment strategist to replace the retiring Frank Uhlenbruch, maintaining strong experience within the team. ESG strategist Liz Harrison is also a recent senior addition who has been leading the team's broader push into sustainability. The strategy offers more flexibility and less interest-rate risk relative to a typical Australian bond offering, courtesy of its split index (50/50 AusBond Bank Bills and AusBond Composite indexes). In addition to the traditional AusBond Composite Index universe (Australian government and government-related bonds, credit, and securitized instruments) the portfolio can invest in riskier sectors like emerging markets, loans, and high yield, though the team has historically used these exposures sparingly. The portfolio can also invest in hybrids opportunistically. The strategy's structurally lower duration was beneficial during the 2021-23 rising interest-rate environment relative to Morningstar Category peers. This strategy tends to allocate more heavily to credit for income yield and overall is expected to provide less defensive cushion in periods where equity markets sell off. The quality of the Janus Henderson capability makes this a strong choice for investors seeking a more flexible absolute return approach with less interest-rate risk. The primary vehicle from which this strategy's pillar ratings are derived is Janus Henderson Tactical Income, ticker 17406. This vehicle has been assigned a Morningstar Medalist Rating of Bronze as of date July 31, 2024. An analyst assessed the People, Process, and Parent Pillars of this strategy, and

Morningstar Take by Morningstar Manager Research 31 Jul 2024

We maintain our conviction in Magellan Infrastructure thanks to its highly experienced investment team and disciplined investment process, which adopts a clearly defined but risk-averse approach to investable infrastructure. The strategy's investment team is a knowledgeable and well-resourced group of eight infrastructure/utilities specialists, consisting of five portfolio managers and three investment analysts. Gerald Stack (head of infrastructure and lead portfolio manager) helps the strategy and is an investor we have held in high regard since our coverage of the fund commenced in 2015. While key-person risk can't be fully discounted, we are pleased that Stack and his team have remained stable, focused, and committed during the distractions that have occurred within the broader Magellan business since early 2022. Magellan Infrastructure's fundamental investment process is long-established, time-tested, and rigorously applied. The investment process is more conservative than most peers owing to a strict definition for investable infrastructure, while portfolio construction is disciplined. Under Magellan's investment process, a company must possess an asset that is essential for the efficient functioning of society and have earnings that aren't overly affected by competition, commodity prices, or sovereign risks to be considered for inclusion. This risk-conscious approach typically leads to a greater utilities allocation, though allocations to cyclicals can rise should the view of economic conditions be more optimistic. This measured outlook tends to deliver downside protection in market selloffs, but the strategy can lag during more cyclically driven markets. This was evident in 2022 when the strategy's absence of commodity price-sensitive infrastructure stocks saw the fund materially lag the category benchmark. Despite the risk of short-term deviations from the benchmark, the process is well aligned to investors who allocate to infrastructure for inflation and downside protection. Magellan Infrastructure's strengths include an insightful team, a conservative investment process, and a disciplined portfolio construction methodology. The primary vehicle from

Morningstar Take by Morningstar Manager
 Research 31 Jul 2024

MFS Global Equity retains the qualities we admire: a pair of insightful portfolio managers who actively look to harness the firm’s extensive research staff while patiently implementing their well-trodden process. Comanagers Roger Morley and Ryan McAllister uphold a long-standing tradition of investing in reasonably priced companies with a steady growth outlook. Morley has strong bona fides over his lengthy involvement here while McAllister’s transition to comanager in 2016 has been as smooth as could be hoped; he’s steadily broadened his knowledge across industries and worked cohesively with Morley. Further, we think the duo utilizes MFS’ broader analyst team very effectively. Their long-term perspective remains paramount in gauging their colleagues’ insights on company and industry-level views, and the portfolio managers’ clear recall of how their historic views have evolved reinforces the consistency of the approach taken. The methodical approach is straightforward and disciplined and ignores index weightings, as seen in its long-standing skew to industrials and healthcare companies at the expense of commodities and technology. That said, it hasn’t all been plain sailing. Emphasizing valuation has contributed to stock-specific stumbles, owning some companies facing more concerted cyclical pressures than expected. Tension in balancing quality and value is inevitable, so we are heartened that more borderline prospects have generally been among the smaller-sized positions—a tribute to sensible portfolio construction—while missed opportunities in faster-growing firms have never been this strategy’s calling card. Consternation over subpar performance is understandable, though the market’s abandonment of high-flying growth stocks in 2022 was a reminder that styles can shift from favor swiftly. The team has also continued to identify plenty of longer-term winners elsewhere. MFS also has a demonstrated history of putting client interests ahead of its own when it comes to managing capacity in both its Core and Concentrated global equity strategies. In multiple areas, MFS Global Equity remains a winning proposition. The primary vehicle from which this strategy’s pillar

Morningstar Take by Morningstar Manager
 Research 31 Jul 2024

PIMCO's Global Bond strategy is backed by three skilled managers who draw on the firm's extensive resources, and it benefits from a flexible, diversified approach, earning High ratings on both the People and Process Pillars. Lead manager Andrew Balls has two decades of experience running global and European mandates, and the vast investment team, including veteran comanagers Sachin Gupta and Lorenzo Pagani, is well-equipped to cover rates, currencies, corporates, and structured credit. Pimco's top-down views—driven by the firm's investment committee on which Balls sits—guide the strategy's broad positioning. Within the scope of those themes, Balls and his team consider relative valuations to determine sector, country, and yield-curve positioning. The setup resembles that of many of its global bond Morningstar Category peers, but the approach of this strategy also allows for considerable flexibility. The fund has historically held up to half of its assets in corporate bonds, and up to a third in emerging-markets debt; it can also invest up to 10% in below-investment-grade bonds. The team has used this latitude well and in moderation along with its work in developed market sovereign bonds, which typically anchor the portfolio. Andrew Balls has also tended to stay on the shorter side of the benchmark's duration, which held back returns in the fund's earlier history, but recently helped during periods of interest rate shocks (such as in the first quarter of 2021 and again in 2022). While the manager has recently reduced exposure to most credit-spread sectors, based on the group's overall recognition that markets lack visibility for the short and medium term, Pimco has demonstrated skill in corporate credit, securitized bonds, and currencies over long periods. These performance drivers remain key to the toolset here. Over the trailing three, five, and 10 years through September 2023, the fund's Institutional USD shares have largely outpaced both the category average and the benchmark index, while keeping volatility in check. All told, this team is well-equipped to take advantage of the strategy's flexibility over the long haul. This vehicle has been assigned a Morningstar

Morningstar Take by Morningstar Manager
 Research 31 Jul 2024

Resolution Capital Global Property Securities features four outstanding portfolio managers and a straightforward but comprehensive investment process. This high-conviction strategy remains one of our very favorite ways to access global listed real estate investments. Andrew Parsons is the founder of Resolution Capital and holds the roles of chief investment officer and portfolio manager. Parsons' presence underpins our positive view of the team, but this clearly is not a one-person show. For many years, the firm has used a four-person portfolio-multimanager strategy. The other three managers (Marco Colantonio, Robert Promisel, and Julian Campbell-Wood) joined Resolution in 2002, 2011, and 2013, and are all highly seasoned property investors, putting the Resolution team's experience and stability well above rivals despite periodic turnover among the investment analysts. Each portfolio manager takes responsibility for investing approximately 25% of total funds under management, helping reduce key-person risk. All the portfolio managers use the same proprietary research and adopt the same investment procedures. The time-tested investment process is based on four significant principles: Focus on the underlying real estate asset rather than an index, understand real estate is cyclical and capital-intensive, value strong stewardship, and avoid permanent impairment of capital when investing. Critically, the team uses detailed fundamental analysis combined with a top-down overlay, reflecting the dynamics of various real estate markets, to search for investable property companies and trusts that operate in high-barrier-to-entry markets where landlords have pricing power and have a high level of recurring earnings, combined with low debt levels. The resulting 40- to 60-stock portfolio is concentrated, benchmark-unaware, and mainly diversified across developed markets. The strategy over the decade to June 30, 2024, has outperformed the index. However, being a high-conviction strategy, returns can be volatile against the index in the short term. The strategy comes in several share classes and an exchange-traded fund (ASX:RCAP), with the wholesale version slightly more expensive.

Morningstar Take by Morningstar Manager

Research 31 Jul 2024

Schroder Australian Equity has some notable qualities that continue to warrant our highest conviction. The conscientious leadership of a skilled team and the diligent application of a time-tested process align with key elements of the Morningstar Medalist Rating process. Head of Australian equities Martin Conlon has managed this fund since 2003, after joining Schroders in 1994, while deputy head of equities Andrew Fleming has been with Schroders since 2007 and has 30 years of investing experience. Conlon and Fleming are especially thoughtful in researching companies and understanding the economic backdrop when building the portfolio. In addition, the broader investment team is knowledgeable and perceptive. Turnover for the team has been elevated over the past three years, with 2023 seeing the departures of portfolio managers Joseph Koh and Ray David. That said, the team remains well-resourced, with Ben Chan and Adam Alexander proving credible additions to the team, having joined in 2022. Schroders' investment process involves detailed fundamental bottom-up company assessments to gain an understanding of quality and value. The primary focus of the research is appraising a company's pricing power, long-term sustainability, and midcycle earnings. We appreciate the team's assiduous application of the repeatable investment process. In addition, we applaud the team's multiple-perspectives approach when scrutinizing company risks, including environmental, social, and governance issues and thematic influences. The resulting benchmark-aware portfolio of around 40-70 stocks is long-term, balanced, and value-tilted. The strategy has recovered from its underperformance against the index between 2018 to 2020, with decent outperformance over the past three years to September 2023. In addition to its competitive fee, Schroders' strong qualities increase our confidence in the manager's outperformance over the long term, thus warranting a core position in investors' portfolios. The primary vehicle from which this strategy's pillar ratings are derived is Schroder WS Australian Equity WC, ticker 8847. This vehicle has been assigned a Morningstar Medalist Rating of Bronze as of

Morningstar Take by Morningstar Manager
Research 31 Jul 2024

We retain a high conviction in the team and process underpinning T. Rowe Price Global Equity despite a recent period of challenged performance. Scott Berg has led this strategy since 2012 and is an investor we hold in very high regard. Based in Baltimore, Berg is deeply passionate about investing and consistently exhibits unique and thoughtful insights that set him apart from the competition. While there is some key-person risk, Berg has had a long and successful association with T. Rowe spanning over two decades. His process is highly dependent on leveraging the vast analytical resources provided by the firm. The strategy's investment process seeks stocks with underappreciated growth potential across both developed and emerging markets. The strategy can also invest in private-market opportunities (typically 4% to 6% of the portfolio). Holdings currently include ByteDance (the owner of TikTok) and SpaceX. These off-market investments can present a headwind to performance as they are valued on a conservative basis (only revised upward on new funding rounds but revised down in weak markets via a mark to market against a comparable basket of listed stocks). The portfolio typically trades at higher valuation multiples than both the benchmark and Morningstar Category peer group, but it is highly diversified (ranging from 160 to 235 holdings over the past five years). While Berg takes a long-term, fundamental view, he is also pragmatic when it comes to changes in prevailing conditions. This can result in relatively high portfolio turnover, upward of 80% at times. Calendar-year 2022 was a very challenging period for the strategy, with growth stocks experiencing a broad-based derating on the back of inflation and interest-rate fears. 2023 had a different challenge, with a large portion of the benchmark's return driven by the 'Magnificent Seven' group of US-based technology stocks – Apple, Alphabet, Microsoft, Amazon.com, Meta, Tesla, and Nvidia. While Berg has been generally neutral weight here in aggregate, European and private-market holdings were overall detractors. Despite this, we remain confident Berg will deliver over the full cycle and continue to regard this

Morningstar Take by Morningstar Manager
 Research 29 Feb 2024

A topnotch team and straightforward process make Western Asset Australian Bond a great choice for domestic fixed-income exposure. Anthony Kirkham, head of investment/portfolio manager, is the lead portfolio manager of this strategy, and we have high regard for his investment knowledge and skills. Kirkham is supported by an experienced investment team, consisting of Craig Jendra and Damon Shinnick, co-portfolio managers, and Sean Rogan, research analyst. Drawing on Western Asset's global resources, macroeconomic views are set initially by the firm's global investment strategy committee. Kirkham, Jendra, and Shinnick then collaborate and express shrewd domestic perspectives from these global views, as well as meticulous credit analysis at the sector and issuer levels. The stability of this group and quality of the research are impressive. There's appeal to the strategy's simplistic and relatively conservative investment process, which seeks mispriced domestic fixed-interest securities within various sectors. Sector and issuer limits are applied to help damp the portfolio's volatility in different environments. Still, sector allocation and issuer selection has been strong over long horizons, emphasising the team's rigorous analysis in these areas. That said, the long-standing overweighting in credit relative to the benchmark caused the most pain in 2022 as swap and credit spreads widened. While the portfolio's active duration has been moved around judiciously over the years, the plus or minus 1.0 year range keeps duration close to the index. This can be a hindrance if interest rates rise unexpectedly as they have since mid-2022. Notwithstanding the short-term underperformance, the strength and consistency of the strategy's long term track record against the Morningstar Category index and average provide comfort, and the 0.42% annual fee is competitive relative to peers. All in all, Western Asset Australian Bond remains a strong domestic fixed-income strategy thanks to its best-in-class team and simple investment process. This vehicle has been assigned a Morningstar Medalist Rating of Bronze as of date February 29, 2024. An analyst assessed the People, Process,

and Parent Pillars of this strategy, and this vehicle inherited the analyst's views via StrategyID and AdvisorID. There may be a delay for updated analysts' views on primary vehicles to populate across all associated vehicles of the same strategy. For the most up-to-date analyst views, please review the primary vehicle of this strategy's pillar ratings.

Managed Fund Investment Detail Disclosure Statement - Advanced

Quick Stats

Morningstar Category™

Based on exposure to asset classes, investment sectors, the investment style and market-cap allocation, and the associated risk and return characteristics of funds. The objective of the classification system is to provide groupings of funds which can be reasonably considered to be close investment alternatives and for which performance and other statistics such as fees are comparable.

Morningstar Medalist Rating™

Is the summary expression of Morningstar's forward-looking analysis of investment strategies as offered via specific vehicles using a rating scale of Gold, Silver, Bronze, Neutral, and Negative. The Medalist Ratings indicate which investments Morningstar believes are likely to outperform a relevant index or peer group average on a risk-adjusted basis over time. Investment products are evaluated on three key pillars (People, Parent, and Process) which, when coupled with a fee assessment, forms the basis for Morningstar's conviction in those products' investment merits and determines the Medalist Rating they're assigned. Pillar ratings take the form of Low, Below Average, Average, Above Average, and High. Pillars may be evaluated via an analyst's qualitative assessment (either directly to a vehicle the analyst covers or indirectly when the pillar ratings of a covered vehicle are mapped to a related uncovered vehicle) or using algorithmic techniques. Vehicles are sorted by their expected performance into rating groups defined by their Morningstar Category and their active or passive status. When analysts directly cover a vehicle, they assign the three pillar ratings based on their qualitative assessment, subject to the oversight of the Analyst Rating Committee, and monitor and reevaluate them at least every 14 months. When the vehicles are covered either indirectly by analysts or by algorithm, the ratings are assigned monthly. For more detailed information about the Medalist Ratings, including their methodology, please go to the Section titled "Methodology Documents and Disclosures"

<https://shareholders.morningstar.com/investor-relations/governance/Compliance--Disclosure/default.aspx>

% Data Coverage: the level of data completeness used to generate the overall rating. If the pillar is assigned directly or indirectly by analysts (pillar inheritance), the pillar will have complete data (i.e. 100%). If the pillar is assigned by machine learning algorithm, Morningstar counts the number of data points feeding both the positive and negative models and counts whether the vehicle has strategy-specific data available. A percentage is calculated per pillar. The overall % data coverage is then scaled by pillar weights. Morningstar will not produce a Medalist Rating with less than 80% data availability for algorithmically assigned pillar assessments.

Analyst-Driven Proportion: displays the weighted percentage of a vehicle's pillar ratings assigned directly or indirectly by analysts (pillar inheritance). For example, if the Parent and Process ratings are assigned directly or indirectly by analysts but the Process rating is assigned algorithmically, the Analyst-Driven Proportion for an actively managed vehicle would disclose that 55% of the pillar weight was assigned by analysts. In the case of a passively managed vehicle the Analyst-Driven Proportion would disclose that 90% of the pillar weight was assigned by analysts.

Morningstar Pillars: The three Medalist Rating assessment pillars - People, Parent and Process - may be evaluated via an analyst's qualitative assessment (either directly to a vehicle the analyst covers or indirectly when the pillar ratings of a covered vehicle are mapped to a related uncovered vehicle) or using Morningstar's machine learning algorithm. Pillar ratings take the form of Low, Below Average, Average, Above Average, and High. Pillars evaluated with Morningstar's machine learning algorithm are displayed with "Q" behind the Pillar name.

Morningstar Rating™

The rating is calculated for funds with at least a three-year

history based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance. The top 10% of funds in each peer group receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. The peer group is determined by the fund's Morningstar Category and Legal Type. The Overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its three-, five- and ten-year Morningstar Rating metrics.

Morningstar Take

The Morningstar Take is a summary of Morningstar's overall opinion of the fund manager's strategy and capabilities in the asset class. If Morningstar has not qualitatively reviewed the manager, the PDS Objective and Fund Investment Strategy will appear in its place.

Performance

The performance data given represents past performance and should not be considered indicative of future results. Principal value and investment return will fluctuate, so that an investor's shares when redeemed may be worth more or less than the original investment.

Growth of \$10,000: The graph compares the growth of \$10,000 in a fund with that of a capital market index chosen by Morningstar and with that of the average growth for all funds in its Morningstar peer group. The index is an unmanaged portfolio of specified securities. The index and the category average do not reflect any initial expenses however the category average returns are net of ongoing fees. A fund's portfolio may differ significantly from the securities in the index.

Quartile Rank: The graph represents the fund's total return percentile rank among funds in the same peer group. The black bar on the graph represents the quartile in which the fund-performance ranking falls. If the top quarter of the graph is shaded, for example, the fund performed among the top 25% of its category that year.

Total return reflects performance without adjusting for sales charges but is adjusted to reflect all actual ongoing fund expenses and assumes reinvestment of distributions. Growth return is the percentage change in the scheme's soft close exit price adjusted for any capital re-organisation. Income return is the total return less growth return and reflects the level of distributions from a fund. For Australian funds, performance is not adjusted for taxation. For New Zealand PIE funds, tax credits are added back to the performance. For New Zealand non-PIE funds returns are calculated net of tax. Trailing returns for periods over one year are annualised.

Risk Measures

Standard deviation: Statistical measure of the volatility of the fund's return.

Sharpe ratio: A risk-adjusted measure calculated by using standard deviation and excess return to determine reward per unit of risk. The higher the Sharpe Ratio, the better the fund's historical risk-adjusted performance.

Alpha: A measure of the difference between a portfolio's actual returns and its expected performance, given its level of risk as measured by beta. A positive Alpha figure indicates the portfolio has performed better than its beta would predict.

Beta: A measure of a fund's sensitive to market movements. If beta is greater than one, movements in value of the fund that are associated with movements in the value of the benchmark tend to be amplified.

R-Squared: Measures the relationship between a portfolio and its benchmark. It can be thought of as a percentage from 1 to 100. R-squared can be used to ascertain the significance of a particular beta or alpha. Generally, a higher R-squared will indicate a more useful beta figure.

Fees

Total Cost Ratio (Prospective): Represents the

forward-looking figure encompassing the total non-discretionary fees and costs associated with managing and administering collective investment products.

Buy-Spread/Sell-Spread: A transaction cost incurred by the investor that reflects an estimated transaction costs incurred by the fund in dealing with the underlying securities as shown in the PDS.

Performance Fee Costs: Performance Fee shown in the "Fees and Costs Summary" table in the PDS. It is intended as a representation of potential on-going performance fee expenses and is a calculated average using the performance fee costs from the last five financial years (or as many as the performance fee was applicable). This amount includes the Performance Fee costs arising from Interposed Vehicles.

Investment Management Fee: The Management Fee (MIS) and Investment Fees (Super) shown in the PDS, that is attributable to investment management, which are fees and costs an investor would expect to be charged over the year. This excludes the costs arising from interposed vehicles.

Administration Fees and Costs (Super Funds only): shown in the "Fees and Costs Summary" table in the PDS. This includes OTC Derivative Costs deemed to be Administration costs.

Portfolio

Composition: The graph represents a breakdown of the fund's holdings into general investment classes based on surveyed data provided by the fund manager.

Morningstar Style Box: For equity funds the vertical axis shows the market capitalization of the stocks owned and the horizontal axis shows investment style (value, blend or growth). For fixed-income funds the vertical axis shows the average credit quality of the bonds owned, and the horizontal axis shows interest rate sensitive as measured by a bond's duration (short, intermediate or long).

Top Holdings: The largest exposure of eligible securities within a fund's portfolio. Portfolio holdings information is based on the most recent information available to Morningstar, and eligible securities are defined by Morningstar's Global Methodology team, and will exclude positions not considered core to the portfolio.

Top 5 Sector Weightings: The Morningstar sector structure divides the stock universe into 129 industries ranging from semiconductors to medical equipment. These industries are classified into 41 industry groups, which are then used to construct 12 separate sectors.

Top 5 Countries: The largest geographical exposure of a fund's stock assets. Country assignments are based on the primary exchange where each stock is traded.

Operations

Minimum Initial Investment: The smallest investment amount accepted by the product to establish a new account.

Minimum Additional Investment: The amount required to make subsequent investments in the product.

Minimum Withdrawal: The smallest amount that can be taken out of the product at one time.

Switching Allowed: If it's possible to switch between investments in the same offer document.

Distributions Frequency: The number of times per year a fund intends to distribute for the life of the offer document.
