Bentham Global Income is a strong multisector credit option harnessing the expertise of its veteran leader, Richard Quin, who has demonstrated a strong ability to navigate challenging investment markets through the investment cycle. Bentham's investment team is relatively small and Australia-based, with managing director and portfolio manager Quin at the helm alongside founding partners Nik Persic and Mark Fabry, who serve as the deputy portfolio manager and senior credit analyst, respectively. They are supported by eight credit and data analysts. An exclusive arrangement with UBS' Credit Investments Group offers a key edge, bringing institutional-grade global analysis for its largest allocations in high yield and loans. Bentham's focus is on identifying relative value across countries, sectors, and the capital structure, relying on top-down views and bottom-up research. This has led to high-conviction shifts in credit and interest rate positioning, which have typically proved successful, but not always. The depth and rigor of Bentham's process stand out, and the process has been further bolstered by its heavy investment in visualization tools and other portfolio management systems. Bentham has adopted a more defensive posture since 2022, although the resultant longer-duration tilt has detracted relative to peers. A differentiated tail-risk-hedging program adds further downside protection support. While the strategy's 0.77% fee sits above peers, it reflects the greater research depth required for its impressively broad global credit universe. Bentham's approach carries inherent differences relative to peers. For example, its willingness to change duration significantly contrasts with the average peer's low-duration bias and can lead to bouts of peer-relative underperformance, including in recent years. That said, conviction is retained in the team's capabilities to successfully manage its broad range of levers to generate income and solid returns over the long term. The primary vehicle from which this

Morningstar Take by David Little 27 Apr 2026

The CFS Index Australian Bond strategy is managed by BlackRock's Australian fixed-income team, which supports our conviction. BlackRock's investment process for achieving low-cost index replication is established and differentiated via its scale and trading abilities, and the team is skilled and experienced in its implementation. Prior to this, the strategy was managed by First Sentier's Australian fixed-income team until its closure in April 2024. The strategy is now aligned with the flagship version of BlackRock's Australian Index Bond strategy and is a low-cost, broad-based Australian fixed-income solution that tracks the Bloomberg AusBond Composite 0+ Index. Portfolio manager Craig Vardy and the supporting team have reliably replicated the underlying benchmark characteristics with a narrow tracking error. Historically, the strategy's returns have carried higher sensitivity to interest-rate changes owing to the portfolio's higher duration relative to the average Morningstar Category peer. This can be attributed to the substantial allocation to long-term government and semigovernment bonds, which accounted for more than three-quarters of the total exposure as of June 30, 2025. The remainder of the portfolio mostly consists of corporate bonds and supranational securities. Thus, credit risk is low. In general, active managers possess the flexibility to adjust to interest-rate changes, whereas passive investments are bound to the benchmark with minimal control over their risk and duration profile. This was evidenced from 2021 through to 2024 when more active managers outperformed the benchmark, while passives struggled. However, over the longer term, passives have shown more consistent alpha profiles relative to the category average. Overall, BlackRock's strong investment management platform, experienced team, and low fees are key attributes behind our conviction in this being a consistent proxy for domestic fixed-interest exposure. The primary vehicle from which this strategy's pillar ratings are derived is CFS Wholesale Index Australian Bond, ticker 11330.

Morningstar Take by Zunjar Sanzgiri 27 Apr 2026

CFS Wholesale Index Australian Share is a solid choice for investors seeking cost-effective exposure to diversified domestic equities. From Dec. 16, 2024, State Street was appointed as the underlying manager after the closure of RQI's passive indexation capabilities in September 2024. This is a positive appointment, given State Street's legacy and proven expertise in index management. The CFS investment team provides effective management of the daily cash flows, keeping tracking errors tight. The strategy aims to track the S&P/ASX 300 Index, a popular index that captures the investment opportunity set well. The index gives investors additional diversification through exposure to the small- and micro-cap stocks outside the standard S&P/ASX 200 Index. The traditional market-cap-weighting methodology of the index lends itself well to the large and liquid stocks that form the underlying portfolio, which keeps portfolio turnover quite low. However, this approach can lead to stock- or sector-level concentration over time as certain segments of the market have a long run of outperformance over the rest. For instance, as of Feb. 28, 2026, the index is concentrated in financials and resources at 33% and 26%, respectively. The benchmark continues to be difficult for most managers to beat net of fees. We believe that top active managers can overcome this hurdle over a longer time horizon on a risk-adjusted basis, although the consistency of such outperformance is not guaranteed. Also, many of Australia's large companies derive their earnings domestically and are in cyclical sectors. This suggests that the strategy's performance may wax and wane with the broader Australian economy. In summary, a diversified portfolio that represents the collective view of the market offered at an attractive price, the CFS Index Australian Share strategy is a dependable pick for investors seeking Australian equity exposure. The primary vehicle from which this strategy's pillar ratings are derived is CFS Wholesale Indexed Australian Share; Ticker: 7004.

Morningstar Take by Shamir Popat 27 Apr 2026

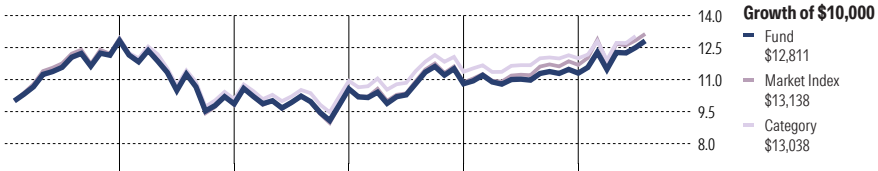

CFS Index Global Property Securities is a reasonable, low-cost passive strategy that provides exposure to the global property market. The underlying investment manager is the State Street investment team that has a well-established pedigree in the passive arena, while the CFS team is responsible for managing the daily cash flows. Carved out of the broader FTSE EPRA Nareit Developed Index, the underlying benchmark FTSE EPRA Nareit Developed ex Australia Rental Index NTR (AUD hedged) comprises names that earn 75% or more of their EBITDA from rental income-producing activities. The global universe allows Australian investors access to more opportunities in subsectors that are not well-represented domestically, such as hospitals, data centers, communication towers, and self-storage. A tilt toward the United States and the exclusion of Australian REIT securities make it a plausible option for global REIT exposure. That said, we believe investing in the global property market can be better exploited by astute active investors, especially with the rental REITs' high sensitivity to global economic conditions. A passively managed strategy does not offer any safe harbor when economic conditions become unfavorable, whereas an active manager has more tools to manage macro risks better. This is evident by higher-rated active strategies falling less than their passive counterparts through the interest rate regime change in late 2022. The underlying outsourced manager, State Street Global Advisors, is a robust index tracker, which bodes well for the strategy. We think the State Street investment team brings competitive indexing skills, having established a solid reputation in the space. Meanwhile, CFS is responsible for managing the daily liquidity for the vehicle. The creation of a cash management and derivatives unit in 2023, led by industry veteran John Iles, has been a notable addition. CFS' enhancements to the process have addressed our previous concerns around inefficiencies, considering the critical function of executing the daily cash management. In essence, the CFS Index Global Property Securities strategy has a solid

Morningstar Take by Zunjar Sanzgiri 27 Apr 2026

CFS Index Global Bond is a solid passive offering for Australian investors in the global fixed-interest segment. The underlying State Street investment team has a solid track record in the passive indexing space while the continued improvement in CFS cash management functions is a positive. The strategy tracks the Bloomberg Global Aggregate Bond Index (AUD Hedged), a diversified global bond index consisting of predominantly high-quality securities. The portfolio primarily spans across Treasuries (55%), corporates (23%), and government-agency-related issuances (5%), with the remainder in securitized debt as of November 2025. US bonds constitute a substantial part of the portfolio (40%), while most of the remainder is spread across Europe and Asia. We view this index as a sensible choice for developed-market bond exposure. That said, we opine that this portfolio's investment universe possesses risk characteristics better suited to active managers to navigate. Specifically, the benchmark-aligned duration of the portfolio, not to mention its inflexibility around country/sector distribution, can be detractors to performance. We think active managers have more levers to navigate global bond market risk events such as periods of rising interest rates, inflation, or scenarios of economic or political instability. The underlying outsourced manager, State Street Global Advisors, is a robust index-tracker, which bodes well for the strategy. The stable and tenured investment team at State Street continue to show their competitiveness in indexation. The investment team at CFS has expanded after its restructuring, with CIO Jonathan Armitage guiding the unit. The creation of a cash management and derivatives unit led by industry veteran John Iles has led to visible improvements in tracking efficiency. In all, the CFS Index Global Bond is a practical, low-cost solution with a well-credentialed underlying manager. The primary vehicle from which this strategy's pillar ratings are derived is CFS Wholesale Indexed Global Bond, ticker: 3700.

Morningstar Take by Shamir Popat 27 Apr 2026

CFS Index Global Shares and the CFS Index Global Shares Hedged funds are credible low-cost options for exposure to unhedged and hedged global equities, respectively. The indexation approach has merits, especially as many active strategies generally struggle to deliver better risk-adjusted performance in this segment. This strategy boasts the right blend of the index, a strong underlying index tracker in State Street Investment Management, and competitive fees. The CFS investment team provides effective management of the daily cash flows, keeping tracking errors tight. From an indexation perspective, the target indexes for the unhedged and hedged versions, respectively, are the MSCI ACWI ex-Australia Index and its hedged counterpart. These indexes are synonymous with global equity market exposure, providing efficient access to 85% of the global equity market, including giant- to large-cap stocks from 22 developed- and 24 emerging-market economies. These indexes are a high hurdle for active managers to beat in the global equity market segment. The underlying outsourced manager, State Street, is a robust index tracker with a solid experienced team, which bodes well for the strategy. State Street uses full replication and holds nearly all index constituents, keeping weightings closely aligned. The fund's growing scale helps minimize costs and keeps tracking error tight. State Street also squeezes out small gains by using its global trading and research teams to execute more efficiently around index rebalances. Overall, the strategy has investment merits. We think that the low-cost diversified approach to global equities is well-executed by State Street with its indexation pedigree. The primary vehicle from which this strategy's pillar ratings are derived is CFS Wholesale Index Global Share, ticker: 11333.

Morningstar Take by Ibrahim Guled-Warfield 13 Aug 2026

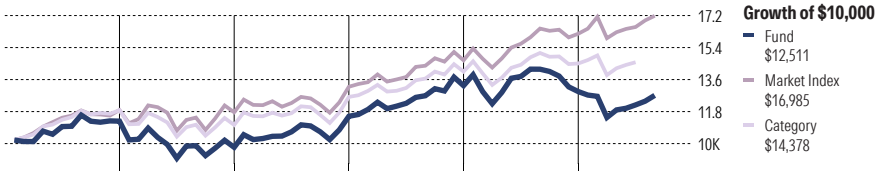

Knowledgeable leadership and a rigorous process underpin our continued confidence in First Sentier Investors Concentrated Australian Share. Head of Australian Equities Growth Dushko Bajic, who has led this strategy since 2014, is capably supported by senior leaders David Wilson and Christian Guerra, whose complementary skill sets are integrated across the unit's suite of portfolios. Importantly, the broader team is tenured, stable, and appears to function in a transparent and cooperative manner, creating an environment that reinforces sound decision-making. FSI's philosophy focuses on owning growing companies reinvesting above their cost of capital, on the belief that these deliver the greatest shareholder value. A standardized research framework and careful accounting scrutiny support repeatable outcomes, while detailed growth scenario modeling and close attention to business drivers make the research actionable. Analysts test those assumptions against industry, macroeconomic, and demographic analysis work, and must distribute evenly across ratings buckets from strong sell to strong buy—a design that encourages conviction and sharper differentiation. That strength largely carries through to stock selection and portfolio construction, where the team manages risk in earnings-constrained sectors with pragmatism by assessing companies on their relative quality. However, Bajic's approach to blending industry, sector, and factor risk relies more on intuition than the structured research process supporting it, though it is informed by a range of proprietary and third-party risk systems and quantitative analyst resources. Despite strong periods of relative performance, the portfolio's growth tilt has left it more exposed during periods of market volatility, including in 2022, 2025, and early 2026. Overall, this strategy's appeal lies in a skilled team that continues to exhibit robust research and practiced portfolio construction. The strategy now closely resembles First Sentier Australian Share, ticker 3404, only differentiated by the exclusion of the flagship strategy's 4%-5% internally managed small-cap sleeve.

PDS Objective

To provide a regular income stream from investments in money market securities with a very low risk of capital loss. The option aims to outperform the returns of Australian money markets over rolling three year periods as measured by the Bloomberg AusBond Bank Bill Index before fees and taxes.

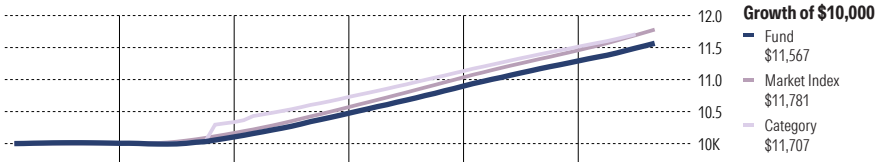

Fund Investment Strategy

The option's strategy is to invest in high quality money market securities (including asset backed securities), with predominantly short maturities, to achieve a very stable income stream. The option invests in assets that offer value-for-risk by taking into account economic analysis and market trends. Derivatives may be used for risk management

Morningstar Take by Eva Cook 07 May 2026

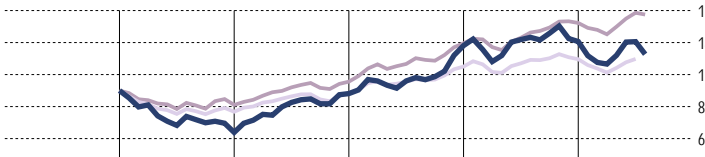

For investors seeking long-term growth through high-conviction, research-led strategies, Hyperion Global Growth Companies remains a standout. Its experienced investment team, rigorous process, and unwavering focus on quality growth continue to underpin its appeal. While the strategy has delivered robust long-term returns, its growth-heavy orientation, sector concentration, and sizable positions in individual stocks—up to 13%—warrant caution for investors with shorter time horizons. Hyperion's investment strategy is led by Chief Investment Officer Mark Arnold, a firm veteran since 1996 and the driving force behind its distinctive growth-focused philosophy. He is supported by Deputy Chief Investment Officer Jason Orthman, who joined in 2008. Together, Arnold and Orthman have steered the investment team through multiple market cycles, earning recognition from Morningstar for their rigorous research and influential thought leadership. Over the past decade, Hyperion has steadily expanded its research capabilities while preserving a low-turnover culture—an approach that reinforces its long-term investment discipline. Hyperion's investment process is anchored in detailed bottom-up analysis, robust financial modeling, and a disciplined 10-year horizon. Distinct from many peers, the firm targets high-quality growth companies with enduring competitive advantages—an increasingly scarce profile within Australia's large-cap universe. This focus naturally steers the portfolio toward mid-cap names and results in a concentrated structure of 15 to 30 holdings, with a pronounced tilt toward technology and healthcare. Mining and energy stocks are deliberately excluded, reflecting Hyperion's view that their earnings volatility and limited pricing power are misaligned with its long-term philosophy. These exclusions, combined with the strategy's growth orientation and concentrated nature, can lead to significant deviations from benchmark performance—a dynamic captured in its Above Average Process Pillar rating. Despite stylistic challenges, Hyperion's strategy has delivered strong long-term results. Over the 10 years to Feb. 28, 2026,

Morningstar Take by Eun Sub Kim 27 Apr 2026

Janus Henderson Tactical Income utilizes a value-oriented process in a more flexible absolute-return-oriented manner, benefiting from the ideas of its high-quality local team. Lead manager Jay Sivapalan has been with the firm for over two decades and has rebuilt a flat and cohesive team culture since assuming sole lead responsibility in 2019. While Sivapalan remains the key individual, this is tempered by the support of Shan Kwee, who impresses with his leadership support and oversight of credit. Janus Henderson is otherwise a reasonably resourced local group, which has shown an ability in recent times to garner a positive flow of investment ideas leading to positive outcomes, particularly within credit. The strategy offers more flexibility and less interest rate risk relative to a typical Australian bond offering—something reflected in its benchmark, which is split 50% between the AusBond Bank Bill and AusBond Composite indexes. In addition to the traditional AusBond Composite Index universe (which entails Australian government and government-related bonds, credit, and securitized instruments), the portfolio can invest in riskier sectors like emerging markets, loans, and high yield through non-AUD issuers. That said, these have historically been used sparingly. Janus Henderson has shown initiative by leading new bond deals through reverse inquiry in the AREITs sector in recent years, which have been additive for performance and require strong relationships that are not easy for peers to replicate. While duration management has not been a strong suit for Janus Henderson, the strategy's structurally lower duration has also been beneficial for performance in recent years relative to its Morningstar Category peers. This strategy tends to allocate more heavily to credit for income yield and is overall expected to provide less of a defensive cushion in periods where equity markets sell off. Janus Henderson's stable and well-led capability makes this a strong choice for investors seeking a more flexible absolute return approach with less interest rate risk. The primary vehicle from which this strategy's pillar ratings

Morningstar Take by Steven Le 27 Apr 2026

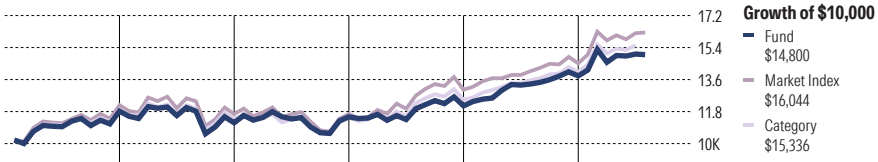

Conviction in Magellan Infrastructure's team has declined following several senior departures, while the view of the process has moderated but remains positive, reflecting a clearly defined investment philosophy. While we noted the departures of Gerald Stack and Jowell Amores in July and November 2025, respectively, the forthcoming departure of David Costello in May 2026 has prompted a recalibration of our view of the team. All three were senior members, making their combined departures significant because of the resulting loss of infrastructure experience within the group. Additionally, the pace of turnover is less than ideal for a fundamentally driven strategy and offsets our positive view of the current co-heads of infrastructure, Ben McVicar and Ofer Karliner, whom we regard for their comprehensive knowledge of the sector. A measured stance is therefore appropriate until this group can demonstrate a sustained period of stability. While no changes to the approach are anticipated, the tempered view reflects reduced confidence in execution rather than in the framework, which we continue to regard positively. Given that bottom-up stock selection drives absolute and relative returns, its success relies on the investment team's judgment, underscoring the importance of team stability and experience. We have historically valued the additional oversight and rigor the investment committee brings to stock analysis, especially in assessing quality. However, changes to the committee's composition over the years have also played a role in shaping the view of the process, although some senior continuity provides comfort in maintaining a constructive stance. In terms of philosophy, Magellan's definition of infrastructure remains one of the most defensive among peers. Its unwavering emphasis on traditional infrastructure stocks reflects a risk-conscious approach that enhances the likelihood of stable, risk-adjusted relative returns. This defensive orientation also supports inflation and downside protection—key traits investors typically seek in infrastructure. Going forward, greater team stability will be key to reinforcing

Morningstar Take by Lena Tsymbaluk 27 Apr 2026

JOHCM Global Emerging Markets Opportunities benefits from experienced managers and an established process. Reflecting our strong conviction, the People and Process Pillar ratings are maintained at Above Average and High, respectively. Managers James Syme and Paul Wimborne have worked together since 2006 (first at Barings, then JOHCM since 2011). In January 2022, Ada Chan, who has been part of the team since 2016 as a dedicated senior analyst, was promoted to a senior fund manager. Two junior team members, Roshni Bolton and Jack Gater, joined in summer 2025 to support the strategy as part of long-term succession planning. We believe this is a sensible and proactive approach to succession planning and allows sufficient time for training, continuity of expertise, and reduced key-person risk. Unlike many peers, the investment approach is driven by top-down analysis of the 26 countries making up the MSCI EM index. The managers continue to use the framework employed at their previous house, producing an overall score for each country and views on the attractiveness of various characteristics. At the stock level, the investment style is growth at a reasonable price. Managers are evaluating stocks for their value and growth appeal through quant screening as well as company visits. The strategy should do well in most market environments given its GARP approach. However, large country bets can affect the performance profile, both positively and negatively. Nevertheless, since taking over the strategy in June 2011 to Dec. 31, 2025, the longest-running share class A for the strategy's Ireland-domiciled vehicle has been ahead of the Morningstar EM TME index and peers. It is pleasing to see that both country allocation and stock selection have added value. Overall, the pragmatic approach with a focus on attractively priced growth stocks should help the strategy to outperform over the cycle. Correction (May 15, 2026): This report was updated to correct the spelling of Jack Gater.

Morningstar Take by Shamir Popat 25 Apr 2026

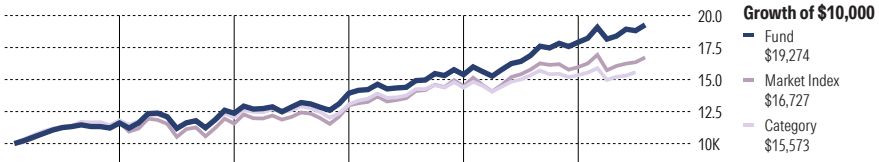

RQI Australian Value is an attractive offering for investors seeking a value-oriented exposure in Australian equities. The systematic approach is differentiated, combining a disciplined value-centric process, a skilled investment team, and competitive fees. The strategy benefits from the strength of its well-resourced investment team of over 15 professionals, led by Dr. David Walsh as head of investments, with a deep bench of senior members, including multiple Ph.D. quantitative specialists. Recent hires across research and implementation have strengthened depth and execution capability. The team's experience in quantitative investing supports ongoing research, disciplined decision-making, and efficient implementation. Research initiatives face clear qualification hurdles, focusing resources on ideas that can be robustly tested and scaled. Depth is reinforced through structured senior-junior pairing on projects, supporting knowledge transfer, innovation, and continuity. The investment process is differentiated in its construction and underpins the Process Pillar's Above Average assessment. It begins with a liquidity and ESG screen across Australian equities before establishing a value-oriented core using accounting measures that are deliberately agnostic to share prices. Five-year averages of adjusted book value, adjusted sales, cash flow, and dividends evolve slowly, creating a stable core Australian equities universe of around 200 investable stocks, which helps in keeping portfolio turnover low at around 17% as of Dec. 31, 2025. This core value portfolio is complemented by roughly 60 alpha signals spanning quality, momentum, additional value measures, and sentiment. These overlays mitigate value traps and sharpen stock selection without diluting the value bias. The resulting portfolio is well-diversified and has around 140 stocks as of March 31, 2026. The team and process have consistently proven successful, exceeding both the category peer group average and category benchmark index 100% of the time on a rolling three-year basis since April 30, 2019, to March 31, 2026. Overall, we maintain our conviction in the

Morningstar Take by Shamir Popat 25 Apr 2026

RQI Global Value has differentiated attributes as a systematic global equity strategy, combining a disciplined valuecentric process, a skilled investment team, and competitive fees. The strategy benefits from the strength of its well-resourced investment team of over 15 professionals, led by Dr. David Walsh as head of investments, with a deep bench of senior members, including multiple Ph.D. quantitative specialists. Recent hires across research and implementation have strengthened depth and execution capability. The team's experience in quant investing supports ongoing research, disciplined decision-making, and efficient implementation. Research initiatives face clear qualification hurdles, focusing resources on ideas that can be robustly tested and scaled. Depth is reinforced through structured senior-junior pairing on projects, supporting knowledge transfer, innovation, and continuity. The investment process is differentiated in its construction and underpins the strategy's Above Average assessment. Five-year averages of adjusted book value, adjusted sales, cash flow, and dividends evolve slowly, creating a stable core universe of around 1,500 investable stocks and containing portfolio turnover to about 37% as of Dec. 31, 2025. This core value portfolio is complemented by roughly 60 alpha signals spanning quality, momentum, additional value measures, and sentiment. These overlays mitigate value traps and sharpen stock selection without diluting the value bias. The resulting portfolio of around 600-850 stocks is benchmark-agnostic across market capitalization, sectors, and regions, supporting broader diversification than many peers. The team and process have consistently proved successful, exceeding both the Morningstar Category average and category benchmark around 80% of the time on a rolling three-year basis from 2019 to March 31, 2026. Overall, RQI Global Value combines a solid team, a differentiated process, and a competitive fee, supporting favorable long-term outcomes for investors. The primary vehicle from which this strategy's pillar ratings are derived is RQI Global Value Class A, ticker 16953.

Morningstar Take by Cerise Bootsma 25 Apr 2026

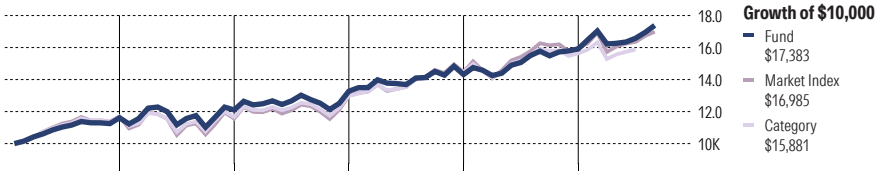

Schroder Australian Equity remains an attractive core proposition in the Australian equities landscape, anchored by a deep and broadly experienced 11-member investment team. The group's collaborative structure and culture of robust debate underpin a disciplined, repeatable process that has delivered credible long-term returns. Schroder Australian Equity is led by Martin Conlon (head of equities since 2003) and Andrew Fleming (deputy head since 2007), supported by a deep bench of senior investors and sector specialists. The team's collaborative structure and daily stock debates foster strong accountability and process discipline. The strategy's philosophy and decision-making remain anchored by Conlon and Fleming, which is crucial given the team turnover over the past few years at an analyst level. The People rating is Above Average, reflecting the team's depth and experience, but key-person risk is notable, while talent retention constraints noted in previous reports are still to be overcome. The High Process Pillar rating reflects a robust, repeatable, and consistently applied investment framework. The strategy employs a bottom-up, fundamental approach focused on sustainable midcycle cash flows, disciplined valuation, and risk management. The team's contrarian mindset and willingness to challenge consensus underpin its edge, with daily stock discussions, a proprietary optimizer, and normalization of analyst biases contributing to a differentiated process. The resulting portfolio typically holds 40–70 stocks, diversified across sectors, with position sizes set by conviction and liquidity. Performance has generally tracked or modestly outperformed the S&P/ASX 200 TR AUD Index and peer group, with notable resilience in downturns and value-led markets. However, the strategy's contrarian bias can lead to periods of underperformance during momentum-driven rallies. Overall, Schroders Australian Equity offers investors a well-diversified core portfolio with a disciplined valuation underpin, supported by skilled leadership and a battle-tested process. Key watchpoints remain around talent retention and succession planning,

Morningstar Take by Stephen Welch 30 Apr 2026

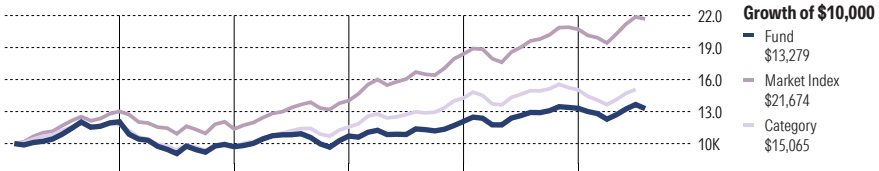

American Funds New Perspective (which includes the Capital Group-branded Luxembourg, Australia, and Japan vehicles, and CFS-branded Australia vehicles) continues to benefit from an accomplished management roster and a deep global analyst bench, even as it undergoes a long-planned leadership transition. Combined with the strategy's proven investment approach, these strengths support its High People and Above Average Process ratings. Although the strategy lost a veteran manager last year and will see another departure this year, Capital Group has executed the leadership transition thoughtfully, and the strategy remains in capable hands. The firm allocates assets between subsidiaries Capital International Investors and Capital World Investors. In early 2025, Barbara Burtin succeeded long-tenured leader Jody Jonsson as head of CWI's team, with Jonsson stepping off at the end of last year. In March 2026, the firm announced that lead Principal Investment Officer Rob Lovelace will hand off responsibilities to Noriko Chen on May 1, 2026, before stepping off the fund at year-end. Chen has run a sleeve of the strategy for 13 years and has been involved with it for more than 25 years. Burtin, who has been with the firm for 17 years, has managed her portion of the portfolio for seven years. Together, they provide experienced leadership through this transition. Most of this globally based management team remains intact, ensuring continuity. As lead PIO, Chen will direct the whole strategy, in charge of allocating capital to the managers, and lead the CII team, which includes Lovelace, Anne-Marie Peterson, Aline Avzaradel, and Kohei Higashi. Burtin oversees CWI's team of Brady Enright, Andraz Razen, Patrice Collette, and Steven Watson. Both teams draw on roughly two separate 50-person analyst groups, with each analyst team also managing a dedicated slice of the portfolio. The team applies a well-established approach focused on global multinationals positioned to benefit from evolving trade dynamics. Typically, these are financially stable, established firms. Each manager independently runs a sleeve but must adhere to requirements

MORNINGSTAR

Morningstar Take continued from previous page

that companies derive at least 25% of revenue from outside their home region and maintain a minimum $3 billion market cap at purchase. The strategy has consistently proved reliable in protecting capital during market downturns, benefiting investors over the long term. Over the trailing 10-, 15-, and 20-year periods through February 2026, the US-domiciled mutual fund outperformed the MSCI ACWI benchmark and ranked in the global large-stock growth Morningstar Category's top third or better each period. In 2025, the strategy landed in the category's top quintile but lagged the index. Overall, this remains a top-tier global equity option with strong prospects to build on its long record of success.

Managed Fund Investment Detail Disclosure Statement - Advanced

Quick Stats

Morningstar Category ™

Based on exposure to asset classes, investment sectors, the investment style and market-cap allocation, and the associated risk and return characteristics of funds. The objective of the classification system is to provide groupings of funds which can be reasonably considered to be close investment alternatives and for which performance and other statistics such as fees are comparable.

Morningstar Medalist Rating ™

Morningstar expresses the Morningstar Medalist Rating™ on a five-tier scale running from Gold to Negative. For both actively and passively managed funds, Morningstar assigns Gold, Silver, and Bronze ratings to vehicles expected to add value over the long term when compared with a relevant Morningstar Category average after accounting for fees and risk. Investment products are evaluated on the fundamental pillars People, Parent, Process and the Medalist Rating Price Score. These Pillars form the spine of Morningstar's research approach, with analysis coalescing around an evaluation of the strategy's management team, the parent firm, the quality and repeatability of the underlying investment process, and the cost of the vehicle at the share class level. The analysis considers the interaction between each pillar which is crucial to understanding a vehicle's overall merit. The pillar ratings take the form of Low (-2), Below Average (-1), Average (0), Above Average (+1), and High (+2). The cost of a product is evaluated using the Medalist Rating Price Score. MPS is a continuous score (as opposed to an integer value) running from negative 2.5 to positive 2.5 based on the percentile rank of a vehicle's expense ratio within its Morningstar Category. For more detailed information about the Medalist Ratings, including their methodology, please go to the section titled "Methodology Documents and Disclosures" at http://global.morningstar.com/managerdisclosures .

Morningstar Disclosure Datapoint

Issuer Initiated Rating: In Australia and New Zealand only, starting from June 2026, Morningstar may receive a fee from product issuers for preparing a Morningstar Medalist Rating on their financial product(s) domiciled in Australia or New Zealand (an "Issuer Initiated Rating"). An Issuer Initiated Rating will apply to a strategy and its associated share classes. Morningstar will clearly identify each Issuer Initiated Rating on the front page of the report and will provide disclosure relating to the party that has paid the associated fee. Fees for an Issuer Initiated Rating are not linked to the rating outcome, and the paying entity has no influence over the analytical process or rating outcome.

Tracks Morningstar Index: Certain managed investments use indexes created by and licensed from Morningstar, Inc., and its subsidiaries as their tracking index. We mitigate any actual or potential conflicts of interest arising from these activities by maintaining and enforcing information barriers, including both technological and non-technological controls, and conducting ongoing monitoring through Morningstar's Compliance department. Morningstar will clearly identify manager research related to such indexes on the front page of the report. Morningstar does not provide qualitative ratings or opinions for investments managed by Morningstar or managed investments that track Morningstar indexes that incorporate discretionary inputs assigned by Morningstar employees on an ongoing basis, such as Morningstar Economic Moat Ratings, or ESG Ratings

Morningstar Rating ™

The rating is calculated for funds with at least a three-year history based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance. The top 10% of funds in each peer group receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. The peer group is determined by the fund's Morningstar Category and Legal Type. The Overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its three-, five- and ten-year Morningstar Rating metrics.

Morningstar Take

The Morningstar Take is a summary of Morningstar's overall opinion of the fund manager's strategy and capabilities in the asset class. If Morningstar has not qualitatively reviewed the manager, the PDS Objective and Fund Investment Strategy will appear in its place.

Performance

The performance data given represents past performance and should not be considered indicative of future results. Principal value and investment return will fluctuate, so that an investor's shares when redeemed may be worth more or less than the original investment.

Growth of $10,000: The graph compares the growth of $10,000 in a fund with that of a capital market index chosen by Morningstar and with that of the average growth for all funds in its Morningstar peer group. The index is an unmanaged portfolio of specified securities. The index and the category average do not reflect any initial expenses however the category average returns are net of ongoing fees. A fund's portfolio may differ significantly from the securities in the index.

Quartile Rank: The graph represents the fund's total return percentile rank among funds in the same peer group. The black bar on the graph represents the quartile in which the fund-performance ranking falls. If the top quarter of the graph is shaded, for example, the fund performed among the top 25% of its category that year.

Total return reflects performance without adjusting for sales charges but is adjusted to reflect all actual ongoing fund expenses and assumes reinvestment of distributions. Growth return is the percentage change in the scheme's soft close exit price adjusted for any capital re-organisation. Income return is the total return less growth return and reflects the level of distributions from a fund. For Australian funds, performance is not adjusted for taxation. For New Zealand PIE funds, tax credits are added back to the performance. For New Zealand non-PIE funds returns are calculated net of tax. Trailing returns for periods over one year are annualised.

Risk Measures

Standard deviation: Statistical measure of the volatility of the fund's return.

Sharpe ratio: A risk-adjusted measure calculated by using standard deviation and excess return to determine reward per unit of risk. The higher the Sharpe Ratio, the better the fund's historical risk-adjusted performance.

Alpha: A measure of the difference between a portfolio's actual returns and its expected performance, given its level of risk as measured by beta. A positive Alpha figure indicates the portfolio has performed better than its beta would predict.

Beta: A measure of a fund's sensitive to market movements. If beta is greater than one, movements in value of the fund that are associated with movements in the value of the benchmark tend to be amplified.

R-Squared: : Measures the relationship between a portfolio and its benchmark. It can be thought of as a percentage from 1 to 100. R-squared can be used to ascertain the significance of a particular beta or alpha. Generally, a higher R-squared will indicate a more useful beta figure.

Fees

Total Cost Ratio (Prospective): Represents the forward-looking figure encompassing the total non-discretionary fees and costs associated with managing and administering collective investment products.

Buy-Spread/Sell-Spread: A transaction cost incurred by the investor that reflects an estimated transaction costs incurred by the fund in dealing with the underlying securities as shown in the PDS.

Performance Fee Costs: Performance Fee shown in the "Fees and Costs Summary" table in the PDS. It is intended as a representation of potential on-going performance fee expenses and is a calculated average using the performance fee costs from the last five financial years (or as many as the performance fee was applicable). This amount includes the Performance Fee costs arising from Interposed Vehicles.

Investment Management Fee: The Management Fee (MIS) and Investment Fees (Super) shown in the PDS, that is attributable to investment management, which are fees and costs an investor would expect to be charged over the year. This excludes the costs arising from interposed vehicles.

Administration Fees and Costs (Super Funds only): shown in the "Fees and Costs Summary" table in the PDS. This includes OTC Derivative Costs deemed to be Administration costs.

Portfolio

Composition: The graph represents a breakdown of the fund's holdings into general investment classes based on surveyed data provided by the fund manager.

Morningstar Style Box: For equity funds the vertical axis shows the market capitalization of the stocks owned and the horizontal axis shows investment style (value, blend or growth). For fixed-income funds the vertical axis shows the average credit quality of the bonds owned, and the horizontal axis shows interest rate sensitive as measured by a bond's duration (short, intermediate or long).

Top Holdings: The largest exposure of eligible securities within a fund's portfolio. Portfolio holdings information is based on the most recent information available to Morningstar, and eligible securities are defined by Morningstar's Global Methodology team, and will exclude positions not considered core to the portfolio.

Top 5 Sector Weightings: The Morningstar sector structure divides the stock universe into 129 industries ranging from semiconductors to medical equipment. These industries are classified into 41 industry groups, which are then used to construct 12 separate sectors.

Top 5 Countries: The largest geographical exposure of a fund's stock assets. Country assignments are based on the primary exchange where each stock is traded.

Operations

Minimum Initial Investment: The smallest investment amount accepted by the product to establish a new account.

Minimum Additional Investment: The amount required to make subsequent investments in the product.

Minimum Withdrawal: The smallest amount that can be taken out of the product at one time.

Switching Allowed: If it's possible to switch between investments in the same offer document.

Distributions Frequency: The number of times per year a fund intends to distribute for the life of the offer document.
