Research Pack

About this research pack

A research pack for financial advisers using the Morningstar CFS FC Growth Active Managed Account Portfolio. This pack shows analyst ratings and/or recommendations on the underlying portfolio holdings.

About Morningstar

Morningstar is a leading provider of asset allocation, portfolio construction and investment research services with over 35 years' experience in the United States, Australia and other international markets. Morningstar advises and manages funds for superannuation funds, institutions, platform distributors, financial advisers and individuals.

Morningstar's disciplined investment approach delivers objective, cost effective and holistic solutions for our clients - helping them reach their financial goals. This long-term, valuation driven approach is underpinned by an emphasis on preserving capital and undertaking comprehensive fundamental analysis of global asset classes and securities.

This document is issued by Morningstar Investment Management Australia Limited (ABN 54 071 808 501, AFS Licence No. 228986) ('Morningstar'). Morningstar Take by Shamir Popat 21 Jul 2026

The Barrow Hanley Global Value Equity strategy continues to warrant our highest convictions for both its stable and skilled team running a disciplined, yet pragmatic value investing approach. Strategy lead Brad Kinkelaar, along with comanagers David Ganucheau and Cory Martin, leverage over 30 years' industry experience on average in demonstrating their skills and insights. They harness the depth and experience of the 26-member investment team, who are organized and measured by their contributions by geography and across sectors. All members of the investment team have equity in the business, fostering investor alignment on top of their competitive remuneration structures. Team changes in 2026 saw one voluntary resignation and a replacement of the healthcare analyst, reflecting active team management rather than disruption, reinforcing our confidence in the team's overall quality. That said, Kinkelaar remains a key-person risk given his central role in portfolio decisions. Robust bottom-up fundamental analysis underpins this strategy, as the team seeks to identify solid businesses that are mispriced by the market. Downside scenarios are clearly a consideration when evaluating the investment theses and avoiding value traps, supporting strong risk management. A distinguishing feature of the strategy is its ability to tilt between defensive and cyclical value positions as market conditions evolve—an outcome of bottom-up stock selection rather than top-down macro calls. As a result, the portfolio may lag during sharp deep-value rallies due to its balanced exposure across value substyles. This process results in a diversified 50- to 70-stock portfolio with an average investment horizon of around three years; commensurately, active share is high, and turnover reasonable between 30% and 40%. Long-term performance supports this view, with consistent outperformance relative to the global large-value category average on rolling performance measures, and evidence of downside resilience in stressed markets. Backed by a high-caliber team and a time-tested value process, the strategy remains a compelling choice for investors

Medalist Rating was prepared at the request of, and was paid for by, the Issuer. See Disclosure for more details.

Bentham Global Income is a strong multisector credit option harnessing the expertise of its veteran leader, Richard Quin, who has demonstrated a strong ability to navigate challenging investment markets through the investment cycle. Bentham's investment team is relatively small and Australia-based, with managing director and portfolio manager Quin at the helm alongside founding partners Nik Persic and Mark Fabry, who serve as the deputy portfolio manager and senior credit analyst, respectively. They are supported by eight credit and data analysts. An exclusive arrangement with UBS' Credit Investments Group offers a key edge, bringing institutional-grade global analysis for its largest allocations in high yield and loans. Bentham's focus is on identifying relative value across countries, sectors, and the capital structure, relying on top-down views and bottom-up research. This has led to high-conviction shifts in credit and interest rate positioning, which have typically proved successful, but not always. The depth and rigor of Bentham's process stand out, and the process has been further bolstered by its heavy investment in visualization tools and other portfolio management systems. Bentham has adopted a more defensive posture since 2022, although the resultant longer-duration tilt has detracted relative to peers. A differentiated tail-risk-hedging program adds further downside protection support. While the strategy's 0.77% fee sits above peers, it reflects the greater research depth required for its impressively broad global credit universe. Bentham's approach carries inherent differences relative to peers. For example, its willingness to change duration significantly contrasts with the average peer's low-duration bias and can lead to bouts of peer-relative underperformance, including in recent years. That said, conviction is retained in the team's capabilities to successfully manage its broad range of levers to generate income and solid returns over the long term. The primary vehicle from which this

Morningstar Take by Shamir Popat 27 Apr 2026

CFS Index Global Shares and the CFS Index Global Shares Hedged funds are credible low-cost options for exposure to unhedged and hedged global equities, respectively. The indexation approach has merits, especially as many active strategies generally struggle to deliver better risk-adjusted performance in this segment. This strategy boasts the right blend of the index, a strong underlying index tracker in State Street Investment Management, and competitive fees. The CFS investment team provides effective management of the daily cash flows, keeping tracking errors tight. From an indexation perspective, the target indexes for the unhedged and hedged versions, respectively, are the MSCI ACWI ex-Australia Index and its hedged counterpart. These indexes are synonymous with global equity market exposure, providing efficient access to 85% of the global equity market, including giant- to large-cap stocks from 22 developed- and 24 emerging-market economies. These indexes are a high hurdle for active managers to beat in the global equity market segment. The underlying outsourced manager, State Street, is a robust index tracker with a solid experienced team, which bodes well for the strategy. State Street uses full replication and holds nearly all index constituents, keeping weightings closely aligned. The fund's growing scale helps minimize costs and keeps tracking error tight. State Street also squeezes out small gains by using its global trading and research teams to execute more efficiently around index rebalances. Overall, the strategy has investment merits. We think that the low-cost diversified approach to global equities is well-executed by State Street with its indexation pedigree. The primary vehicle from which this strategy's pillar ratings are derived is CFS Wholesale Index Global Share, ticker: 11333.

Morningstar Take by Eva Cook 27 Apr 2026

FSI Australian Small Companies remains a standout offering in the small-cap space, combining exceptional leadership with a robust, time-tested process. At the helm is Dawn Kanelleas, a seasoned investor and mentor who has built a diverse, well-structured team, including senior portfolio manager Michael Joukhador, portfolio manager Tahlia Gugusheff, and analysts Minnie Tong and Cissy Xu. Their collective experience spans small-cap, mid-cap, and long-short strategies, adding depth to this small-cap fund's capabilities. The team has maintained continuity after August 2024, and the first departure of a team member since the inception of the fund in 2008. The investment process approach is disciplined and quality-focused, favoring companies with sustainable competitive advantages, strong financials, and predictable earnings. A rigorous process filters out speculative names and those under AUD 50 million in market cap, narrowing the universe to high-quality stocks and making it manageable for the team. Deep stock research is then undertaken, supported by an extensive program of management meetings and site visits. Risk management is central to the process, with 40–60 holdings across sectors, ensuring diversification. The portfolio construction follows a conviction-based framework with systematic sizing and active weights capped at plus or minus 5; important mechanisms to avoid risk-allocation missteps. While the strategy's quality bias can cause it to miss sharp market rebounds, it has consistently delivered downside protection and long-term resilience. A lower-than-peer annual management fee, with no performance fee, makes it attractive compared with peers. The primary vehicle from which this strategy's pillar ratings are derived is FSI Wholesale Australian Small Companies, ticker 7006.

Morningstar Take by Ibrahim Guled-Warfield 13 Aug 2026

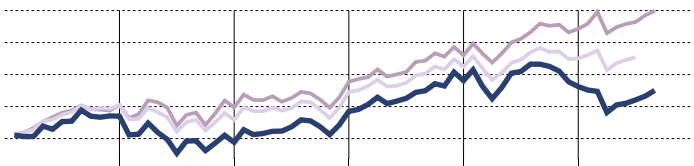

Knowledgeable leadership and a rigorous process underpin our continued confidence in First Sentier Investors Concentrated Australian Share. Head of Australian Equities Growth Dushko Bajic, who has led this strategy since 2014, is capably supported by senior leaders David Wilson and Christian Guerra, whose complementary skill sets are integrated across the unit's suite of portfolios. Importantly, the broader team is tenured, stable, and appears to function in a transparent and cooperative manner, creating an environment that reinforces sound decision-making. FSI's philosophy focuses on owning growing companies reinvesting above their cost of capital, on the belief that these deliver the greatest shareholder value. A standardized research framework and careful accounting scrutiny support repeatable outcomes, while detailed growth scenario modeling and close attention to business drivers make the research actionable. Analysts test those assumptions against industry, macroeconomic, and demographic analysis work, and must distribute evenly across ratings buckets from strong sell to strong buy—a design that encourages conviction and sharper differentiation. That strength largely carries through to stock selection and portfolio construction, where the team manages risk in earnings-constrained sectors with pragmatism by assessing companies on their relative quality. However, Bajic's approach to blending industry, sector, and factor risk relies more on intuition than the structured research process supporting it, though it is informed by a range of proprietary and third-party risk systems and quantitative analyst resources. Despite strong periods of relative performance, the portfolio's growth tilt has left it more exposed during periods of market volatility, including in 2022, 2025, and early 2026. Overall, this strategy's appeal lies in a skilled team that continues to exhibit robust research and practiced portfolio construction. The strategy now closely resembles First Sentier Australian Share, ticker 3404, only differentiated by the exclusion of the flagship strategy's 4%-5% internally managed small-cap sleeve.

PDS Objective

To provide a regular income stream from investments in money market securities with a very low risk of capital loss. The option aims to outperform the returns of Australian money markets over rolling three year periods as measured by the Bloomberg AusBond Bank Bill Index before fees and taxes.

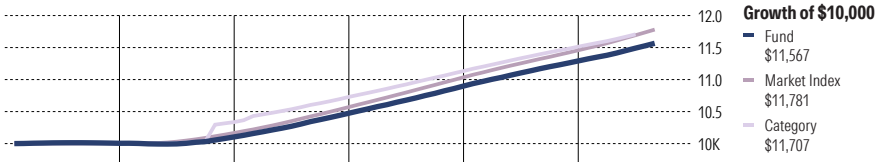

Fund Investment Strategy

The option's strategy is to invest in high quality money market securities (including asset backed securities), with predominantly short maturities, to achieve a very stable income stream. The option invests in assets that offer value-for-risk by taking into account economic analysis and market trends. Derivatives may be used for risk management

Morningstar Take by Eva Cook 07 May 2026

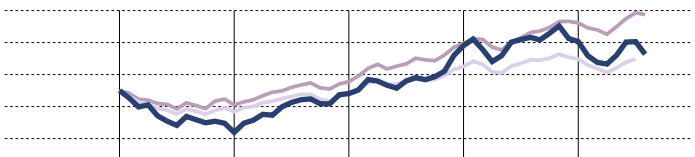

For investors seeking long-term growth through high-conviction, research-led strategies, Hyperion Global Growth Companies remains a standout. Its experienced investment team, rigorous process, and unwavering focus on quality growth continue to underpin its appeal. While the strategy has delivered robust long-term returns, its growth-heavy orientation, sector concentration, and sizable positions in individual stocks—up to 13%—warrant caution for investors with shorter time horizons. Hyperion's investment strategy is led by Chief Investment Officer Mark Arnold, a firm veteran since 1996 and the driving force behind its distinctive growth-focused philosophy. He is supported by Deputy Chief Investment Officer Jason Orthman, who joined in 2008. Together, Arnold and Orthman have steered the investment team through multiple market cycles, earning recognition from Morningstar for their rigorous research and influential thought leadership. Over the past decade, Hyperion has steadily expanded its research capabilities while preserving a low-turnover culture—an approach that reinforces its long-term investment discipline. Hyperion's investment process is anchored in detailed bottom-up analysis, robust financial modeling, and a disciplined 10-year horizon. Distinct from many peers, the firm targets high-quality growth companies with enduring competitive advantages—an increasingly scarce profile within Australia's large-cap universe. This focus naturally steers the portfolio toward mid-cap names and results in a concentrated structure of 15 to 30 holdings, with a pronounced tilt toward technology and healthcare. Mining and energy stocks are deliberately excluded, reflecting Hyperion's view that their earnings volatility and limited pricing power are misaligned with its long-term philosophy. These exclusions, combined with the strategy's growth orientation and concentrated nature, can lead to significant deviations from benchmark performance—a dynamic captured in its Above Average Process Pillar rating. Despite stylistic challenges, Hyperion's strategy has delivered strong long-term results. Over the 10 years to Feb. 28, 2026,

Morningstar Take by Steven Le 27 Apr 2026

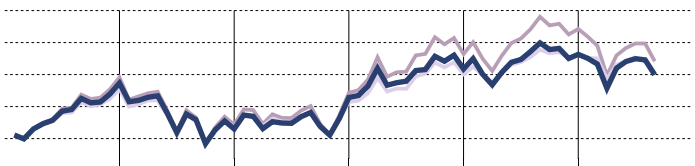

Ironbark Paladin Property Securities remains an impressive strategy, thanks to the diverse skillset of its core team and its differentiated approach. Co-lead portfolio managers Chris Robinson and Todd McFarlane, with small-cap specialist Eloise Blake, have run this strategy with notable effectiveness and consistency since its investment process was enhanced in 2013. Each member brings a distinct skillset to an approach that seeks to generate outperformance over its Morningstar Category index from three distinct sources: stock selection in large-cap Australian REITs, active investment in small-cap AREITs, and selective participation in international deal flow. This setup provides flexibility in a highly concentrated sector. More importantly, the group has demonstrated proficiency in each area over long horizons. Blake also took on portfolio management responsibilities from 2022, a positive step that adds continuity to this tight-knit group—a key differentiator in a category largely made up of small investment teams. The fundamentally driven process evaluates property stocks within each subsector based on relative valuations and quality characteristics, seeking to minimize factor and style bets. Stock selection is the main driver of performance and benefits from collaborative analysis across market segments, with Robinson and McFarlane responsible for overall portfolio construction and large-cap positioning. The pairing approach that is predominantly used in the large-cap space has been a short-term headwind, driven by the overweight position in Goodman Group, the underweight position in Charter Hall, and the broad strength of the Australian listed property sector. That said, missteps in this allocation have been infrequent over the long term, and clear evidence of process adherence and disciplined buy/sell execution in line with long-term stock theses provides confidence in future outcomes. Elsewhere, Robinson leverages his position as head of Asia-Pacific listed real estate securities within DWS' global investment platform to take advantage of opportunistic deal flow (usually placements and IPOs) across the globe.

MORNINGSTAR

Morningstar Take continued from previous page

Even though the portfolio's total international exposure is expected to remain below 5% at any point in time, it has nonetheless been a consistent and valuable contributor to relative returns. Blake's focus on small caps ensures readiness to capitalize on opportunities in emerging, less efficient, and underresearched areas of the market, a lever that has proved a solid contributor to long-term performance. Overall, our conviction in this strategy remains steadfast, supported by a robust team and approach. The primary vehicle from which this strategy's Pillar ratings are derived is Ironbark Paladin Property Securities, ticker 5050.

Morningstar Take by Steven Le 27 Apr 2026

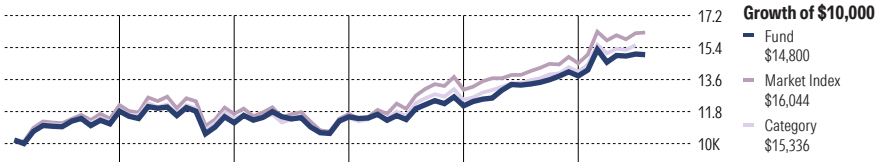

Conviction in Magellan Infrastructure's team has declined following several senior departures, while the view of the process has moderated but remains positive, reflecting a clearly defined investment philosophy. While we noted the departures of Gerald Stack and Jowell Amores in July and November 2025, respectively, the forthcoming departure of David Costello in May 2026 has prompted a recalibration of our view of the team. All three were senior members, making their combined departures significant because of the resulting loss of infrastructure experience within the group. Additionally, the pace of turnover is less than ideal for a fundamentally driven strategy and offsets our positive view of the current co-heads of infrastructure, Ben McVicar and Ofer Karliner, whom we regard for their comprehensive knowledge of the sector. A measured stance is therefore appropriate until this group can demonstrate a sustained period of stability. While no changes to the approach are anticipated, the tempered view reflects reduced confidence in execution rather than in the framework, which we continue to regard positively. Given that bottom-up stock selection drives absolute and relative returns, its success relies on the investment team's judgment, underscoring the importance of team stability and experience. We have historically valued the additional oversight and rigor the investment committee brings to stock analysis, especially in assessing quality. However, changes to the committee's composition over the years have also played a role in shaping the view of the process, although some senior continuity provides comfort in maintaining a constructive stance. In terms of philosophy, Magellan's definition of infrastructure remains one of the most defensive among peers. Its unwavering emphasis on traditional infrastructure stocks reflects a risk-conscious approach that enhances the likelihood of stable, risk-adjusted relative returns. This defensive orientation also supports inflation and downside protection—key traits investors typically seek in infrastructure. Going forward, greater team stability will be key to reinforcing

Morningstar Take by Mara Dobrescu 25 Apr 2026

The Pimco Global Bond strategy is backed by three skilled managers who draw on the firm's extensive resources, and it benefits from a flexible, diversified approach, earning High ratings on both its People and Process Pillars. Lead manager Andrew Balls has two decades of experience running global and European mandates, and the vast investment team, including veteran comanagers Sachin Gupta and Lorenzo Pagani, is well-equipped to cover rates, currencies, corporates, and structured credit. Pimco's top-down views—driven by the firm's investment committee on which Balls sits—guide the strategy's broad positioning. Within the scope of those themes, Balls and his team consider relative valuations to determine sector, country, and yield-curve positioning. The setup resembles that of many of its global-bond Morningstar Category peers, but the approach of this strategy also allows for considerable flexibility. The fund has historically held up to half its assets in corporate bonds, and up to one-third in emerging-market debt; it can also invest up to 10% in below-investment-grade bonds. The team has used this latitude well and in moderation along with its work in developed-market sovereign bonds, which typically anchor the portfolio. Balls has also tended to stay on the shorter side of the benchmark's duration, which held back returns in the fund's earlier history, but recently helped during periods of interest rate shocks (such as in the first quarter of 2021 and again in 2022). While the portfolio's exposure to credit risk is currently on the lighter side, given the team's somewhat cautious top-down views, over long periods, Pimco has demonstrated considerable skill in corporate credit, securitized bonds, and currencies. Over the trailing three, five, and 10 years through January 2026, the fund's institutional USD shares largely outpaced both the category average and the benchmark index while keeping volatility in check. All told, this team is well-equipped to take advantage of the strategy's flexibility over the long haul.

Morningstar Take by Shamir Popat 25 Apr 2026

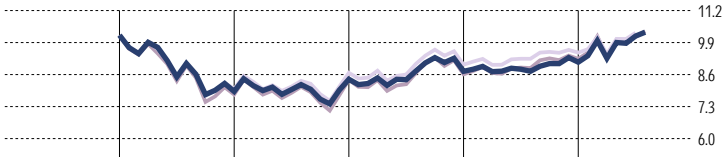

Resolution Capital's Global Property Securities strategy continues to merit High ratings for both People and Process Pillars, thanks to its standout team and a time-tested and robust investment approach. Chief Investment Officer and Founder Andrew Parsons leads the seasoned portfolio-management team, comprising Marco Colantonio (2002), Robert Promisel (2011), and Julian Campbell-Wood (2013, portfolio manager since 2018). The multisleeve structure has been in place for over a decade, promoting accountability, challenge, and continuity, while reducing key-person risk. Supporting them are six analysts, averaging over a decade of experience, organized by sectors. The analyst team runs a paper portfolio, fostering a devil's advocate culture and cohesiveness between the members. Analysts rotate across the firm's other property strategies, accelerating development and reinforcing a global mindset. Turnover in the analyst ranks has been moderate, with two departures over two years offset by two timely and strategic hires. The investment process has a clear philosophy, focusing on high-quality, low-leverage REITs with recurring earnings and strong stewardship. This has been a key underpin to the long-term outperformance of the strategy. However, short-term challenges over the 12 months to Aug. 31, 2025, saw the process underperform the Morningstar Category index by 2%. Underweighting residential, retail, and office detracted. The process, given its disciplined application of valuations, struggled in timing the cyclical inflection points, with early moves to UK and European storage, while underestimating the broader sector resilience across data centers and retail. Despite the short-term blip, our conviction in the approach to deliver long-term alpha is retained. The idea generation and deep research continue to demonstrate value—leveraging the deep sector skills of the team, supported by detailed site visits and management interactions. The disciplined quality focus on longer-term lease structures, sharper capital allocation, and higher pricing power is evidenced through high-conviction names like Welltower, Ventas, and

Digital Realty. Additionally, notable process efficiencies and edges are gained from the firm's proprietary Swordfish system. Overall, Resolution Capital's skilled team and repeatable process continue to earn our continued confidence. The strategy has unhedged and hedged share classes and an exchange-traded fund (ASX: RCAP). The primary vehicle from which this strategy's pillar ratings are derived is Resolution Capital Global Property Securities, ticker 16747. As of October 2024, Morningstar has refined its alpha assessment methodology, a key input to the Medalist Rating. As a result, some fund ratings under this strategy have declined, despite no changes to pillar ratings or fees.

Morningstar Take by Cerise Bootsma 25 Apr 2026

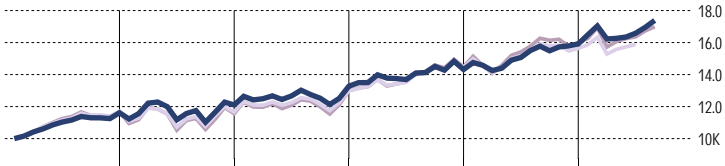

Schroder Australian Equity remains an attractive core proposition in the Australian equities landscape, anchored by a deep and broadly experienced 11-member investment team. The group's collaborative structure and culture of robust debate underpin a disciplined, repeatable process that has delivered credible long-term returns. Schroder Australian Equity is led by Martin Conlon (head of equities since 2003) and Andrew Fleming (deputy head since 2007), supported by a deep bench of senior investors and sector specialists. The team's collaborative structure and daily stock debates foster strong accountability and process discipline. The strategy's philosophy and decision-making remain anchored by Conlon and Fleming, which is crucial given the team turnover over the past few years at an analyst level. The People rating is Above Average, reflecting the team's depth and experience, but key-person risk is notable, while talent retention constraints noted in previous reports are still to be overcome. The High Process Pillar rating reflects a robust, repeatable, and consistently applied investment framework. The strategy employs a bottom-up, fundamental approach focused on sustainable midcycle cash flows, disciplined valuation, and risk management. The team's contrarian mindset and willingness to challenge consensus underpin its edge, with daily stock discussions, a proprietary optimizer, and normalization of analyst biases contributing to a differentiated process. The resulting portfolio typically holds 40–70 stocks, diversified across sectors, with position sizes set by conviction and liquidity. Performance has generally tracked or modestly outperformed the S&P/ASX 200 TR AUD Index and peer group, with notable resilience in downturns and value-led markets. However, the strategy's contrarian bias can lead to periods of underperformance during momentum-driven rallies. Overall, Schroders Australian Equity offers investors a well-diversified core portfolio with a disciplined valuation underpin, supported by skilled leadership and a battle-tested process. Key watchpoints remain around talent retention and succession planning,

Morningstar Take by Eva Cook 03 Aug 2026

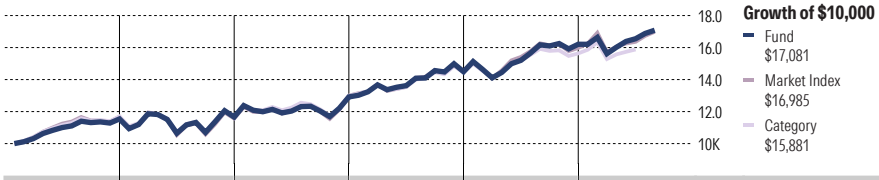

Solaris Core Australian Equity is a compelling choice for investors seeking diversified, style-neutral exposure to actively managed Australian large-cap equities. The fund continues to impress, thanks to its seasoned team, its sound investment philosophy and risk management, and its investor-aligned structure. Solaris maintains its Above Average People Pillar rating, despite the departure of analyst Charles Story in June 2026. The rating is supported by a highly experienced team whose senior members have worked together for more than 25 years, first at Suncorp and now at Solaris. Although Story's departure creates a setback in the mining sector and from a succession-planning perspective, the effect has been mitigated by the team's depth and effective redistribution of responsibilities. Story's duties were transferred internally, reflecting the depth of the team and Solaris' collaborative culture. The firm's research model assigns analysts responsibility for stock selection and portfolio management within their sectors, fostering accountability and deep industry expertise. CIO Michael Bell provides overarching portfolio oversight and risk management, ensuring a cohesive, benchmark-aware portfolio. Solaris' flat structure, broad employee ownership, and meaningful personal investment in its strategies create strong alignment with investors and have helped attract and retain talent. The smooth handling of both Sean Martin's 2023 departure and Story's 2026 exit further demonstrates the firm's resilience and leadership. Solaris' investment approach combines disciplined bottom-up stock research with benchmark-aware, style-neutral portfolio construction. The strategy continues to warrant a High Process Pillar rating, underpinned by consistent implementation and a strong relationship between conviction and portfolio weights, with stocks offering superior risk-adjusted return potential receiving larger allocations. A key differentiator is Solaris' robust risk-management framework, which seeks to ensure returns are driven predominantly by stock selection rather than unintended sector, market-cap, or factor exposures. This

MORNINGSTAR

Morningstar Take continued from previous page

disciplined portfolio design has historically produced a risk profile lower than the benchmark while providing investors with a differentiated source of alpha relative to peers who can rely more heavily on concentrated positions or style-driven bets. Investors are offered two pricing models: a straightforward base-fee option at 0.90% annually and the PA share class, which forgoes a management fee entirely in favor of a 30% performance fee on returns exceeding the ASX 200 benchmark. With cost parity achieved at a gross alpha of 3% and the manager's internal alpha target set between 2% and 3%, the PA option represents compelling value—particularly given Solaris' historically low tracking error. Long-term performance has been above the category index and peers despite a difficult period around the covid pandemic. Solaris Core Australian Equities continues to stand out as a top-tier choice for investors seeking a core allocation to an Australian large-cap manager. The primary vehicle from which this strategy's pillar ratings are derived is Solaris Core Australian Equity, ticker 16567.

Morningstar Take by Steven Le 24 Apr 2026

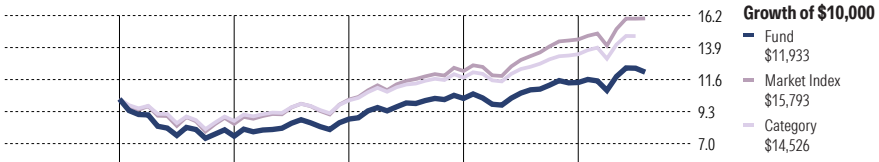

An adept portfolio manager and comprehensive process make T. Rowe Price Global Equity an excellent offering. Scott Berg has led this strategy since 2012 and is an investor we hold in high regard. Berg stands out as one of the most deeply passionate investors, consistently exhibiting unique and thoughtful research that sets him apart from most of the competition. A key source of his distinct insights is drawn from direct access to some of the most influential industry figures, including CEOs of world-leading firms, connections that few others can claim. Although key-person risk exists here, Berg's long and successful association with T. Rowe Price provides reassurance around the continuity of his tenure. In addition, his process is highly dependent on leveraging T. Rowe Price's vast analytical resources, making it difficult to replicate this approach at many other or smaller competing firms. The appointment of Iona Dent as an associate portfolio manager in February 2024 is a welcome addition, bringing direct emerging-markets research experience to the core team. While it provides some continuity beyond Berg, it's too early to consider her as the successor here. The investment process seeks stocks with underappreciated growth potential across both developed and emerging markets. Enabled by the firm's expansive global research platform, the strategy draws alpha from a diverse opportunity set while maintaining a highly diversified portfolio of around 200 stocks, differentiating it from the more concentrated portfolios of many peers. Long-term allocations have been dominated by giant- and large-cap stocks, with US equities forming a key part of the mix—areas where research and stock selection have been foundational strengths. The portfolio has had a long-standing allocation to private (typically about 5% of the portfolio) and emerging-markets (historically around 20%) companies. The ability to invest in these areas provides the strategy with additional levers to outperform the Morningstar Category index. Despite periods of underperformance in the emerging-markets sleeve, regular travel to conduct on-the-ground research

MORNINGSTAR

Morningstar Take continued from previous page

in the region provides continued confidence that diligence and rigor underpin stock selection. Holdings such as ByteDance (the owner of TikTok) showcase its flexibility to generate alpha from a broad range of sources and research acumen in niche segments. While these exposures introduce both absolute and relative risk, robust portfolio diversification and prudent position sizing ensure that no single holding dominates the overall performance. Investors should be aware that the firm's internal and conservative valuation approach of private companies may occasionally drag on performance, such as the markdown technology companies in 2025, as assets are only revised upward on new funding rounds and adjusted downward in weak markets via a mark-to-market against a comparable basket of listed stocks. Nevertheless, we are comfortable with the integrity of the valuation methodology because of its simplicity and consistency over time. Overall, a proficient portfolio manager and rigorous approach underpin our resolute confidence in the strategy's team and process. The primary vehicle from which this strategy's Pillar ratings are derived is T. Rowe Price Global Equity, ticker 14479.

Morningstar Take by Thomas Dutka 13 Aug 2026

A simple approach and excellent team make this a solid domestic fixed-income option. Anthony Kirkham is the lead manager, and we hold him in high regard. He is supported by a stable, impressive investment team of six portfolio managers, credit research analysts, and traders. Other than recent appointee Stella Li, an internal hire who filled the role vacated in early 2024 by trader Anthony Francis, the remaining five team members each boast over 25 years of industry experience and extensive tenures working together. There's an appeal to the strategy's straightforward and relatively conservative investment process. Targeting an active return of 75 basis points per year (gross of fees) above the Bloomberg AusBond Composite 0+ Index, it seeks mispriced domestic fixed-interest securities, with sector allocation and issuer selection the key active return drivers. While the strategy's persistent credit overweighting can be a detractor relative to the benchmark in risk-off conditions, the strategy tends to play it safe versus peers—it rarely invests in sub-investment-grade debt or ventures offshore, and the team has successfully navigated a number of credit cycles, reflecting its rigorous credit analysis. While it has modestly underperformed its return objective over the medium to longer term, it has done so by utilizing active risk well below its target, delivering robust risk-adjusted returns. It has also fared well against its Morningstar Category average. While Western Asset's global team faced headwinds and elevated turnover following the departure of co-CIO Ken Leech in mid-2024 amid regulatory charges, this strategy's Australian focus and its veteran Melbourne-based team have been well-insulated; its quality remains intact. Overall, despite offshore turmoil, our conviction in this strategy remains unchanged; a high-quality team and simple approach make it a compelling domestic fixed-income offering. The primary vehicle from which this strategy's pillar ratings are derived is Western Asset Australian Bond, ticker 5471.

Morningstar Take by Stephen Welch 30 Apr 2026

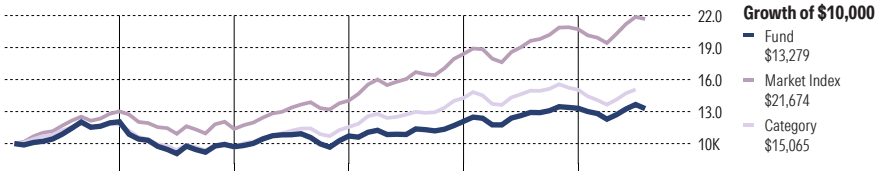

American Funds New Perspective (which includes the Capital Group-branded Luxembourg, Australia, and Japan vehicles, and CFS-branded Australia vehicles) continues to benefit from an accomplished management roster and a deep global analyst bench, even as it undergoes a long-planned leadership transition. Combined with the strategy's proven investment approach, these strengths support its High People and Above Average Process ratings. Although the strategy lost a veteran manager last year and will see another departure this year, Capital Group has executed the leadership transition thoughtfully, and the strategy remains in capable hands. The firm allocates assets between subsidiaries Capital International Investors and Capital World Investors. In early 2025, Barbara Burtin succeeded long-tenured leader Jody Jonsson as head of CWI's team, with Jonsson stepping off at the end of last year. In March 2026, the firm announced that lead Principal Investment Officer Rob Lovelace will hand off responsibilities to Noriko Chen on May 1, 2026, before stepping off the fund at year-end. Chen has run a sleeve of the strategy for 13 years and has been involved with it for more than 25 years. Burtin, who has been with the firm for 17 years, has managed her portion of the portfolio for seven years. Together, they provide experienced leadership through this transition. Most of this globally based management team remains intact, ensuring continuity. As lead PIO, Chen will direct the whole strategy, in charge of allocating capital to the managers, and lead the CII team, which includes Lovelace, Anne-Marie Peterson, Aline Avzaradel, and Kohei Higashi. Burtin oversees CWI's team of Brady Enright, Andraz Razen, Patrice Collette, and Steven Watson. Both teams draw on roughly two separate 50-person analyst groups, with each analyst team also managing a dedicated slice of the portfolio. The team applies a well-established approach focused on global multinationals positioned to benefit from evolving trade dynamics. Typically, these are financially stable, established firms. Each manager independently runs a sleeve but must adhere to requirements

MORNINGSTAR

Morningstar Take continued from previous page

that companies derive at least 25% of revenue from outside their home region and maintain a minimum $3 billion market cap at purchase. The strategy has consistently proved reliable in protecting capital during market downturns, benefiting investors over the long term. Over the trailing 10-, 15-, and 20-year periods through February 2026, the US-domiciled mutual fund outperformed the MSCI ACWI benchmark and ranked in the global large-stock growth Morningstar Category's top third or better each period. In 2025, the strategy landed in the category's top quintile but lagged the index. Overall, this remains a top-tier global equity option with strong prospects to build on its long record of success.

Managed Fund Investment Detail Disclosure Statement - Advanced

Quick Stats

Morningstar Category ™

Based on exposure to asset classes, investment sectors, the investment style and market-cap allocation, and the associated risk and return characteristics of funds. The objective of the classification system is to provide groupings of funds which can be reasonably considered to be close investment alternatives and for which performance and other statistics such as fees are comparable.

Morningstar Medalist Rating ™

Morningstar expresses the Morningstar Medalist Rating™ on a five-tier scale running from Gold to Negative. For both actively and passively managed funds, Morningstar assigns Gold, Silver, and Bronze ratings to vehicles expected to add value over the long term when compared with a relevant Morningstar Category average after accounting for fees and risk. Investment products are evaluated on the fundamental pillars People, Parent, Process and the Medalist Rating Price Score. These Pillars form the spine of Morningstar's research approach, with analysis coalescing around an evaluation of the strategy's management team, the parent firm, the quality and repeatability of the underlying investment process, and the cost of the vehicle at the share class level. The analysis considers the interaction between each pillar which is crucial to understanding a vehicle's overall merit. The pillar ratings take the form of Low (-2), Below Average (-1), Average (0), Above Average (+1), and High (+2). The cost of a product is evaluated using the Medalist Rating Price Score. MPS is a continuous score (as opposed to an integer value) running from negative 2.5 to positive 2.5 based on the percentile rank of a vehicle's expense ratio within its Morningstar Category. For more detailed information about the Medalist Ratings, including their methodology, please go to the section titled "Methodology Documents and Disclosures" at http://global.morningstar.com/managerdisclosures .

Morningstar Disclosure Datapoint

Issuer Initiated Rating: In Australia and New Zealand only, starting from June 2026, Morningstar may receive a fee from product issuers for preparing a Morningstar Medalist Rating on their financial product(s) domiciled in Australia or New Zealand (an "Issuer Initiated Rating"). An Issuer Initiated Rating will apply to a strategy and its associated share classes. Morningstar will clearly identify each Issuer Initiated Rating on the front page of the report and will provide disclosure relating to the party that has paid the associated fee. Fees for an Issuer Initiated Rating are not linked to the rating outcome, and the paying entity has no influence over the analytical process or rating outcome.

Tracks Morningstar Index: Certain managed investments use indexes created by and licensed from Morningstar, Inc., and its subsidiaries as their tracking index. We mitigate any actual or potential conflicts of interest arising from these activities by maintaining and enforcing information barriers, including both technological and non-technological controls, and conducting ongoing monitoring through Morningstar's Compliance department. Morningstar will clearly identify manager research related to such indexes on the front page of the report. Morningstar does not provide qualitative ratings or opinions for investments managed by Morningstar or managed investments that track Morningstar indexes that incorporate discretionary inputs assigned by Morningstar employees on an ongoing basis, such as Morningstar Economic Moat Ratings, or ESG Ratings

Morningstar Rating ™

The rating is calculated for funds with at least a three-year history based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance. The top 10% of funds in each peer group receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. The peer group is determined by the fund's Morningstar Category and Legal Type. The Overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its three-, five- and ten-year Morningstar Rating metrics.

Morningstar Take

The Morningstar Take is a summary of Morningstar's overall opinion of the fund manager's strategy and capabilities in the asset class. If Morningstar has not qualitatively reviewed the manager, the PDS Objective and Fund Investment Strategy will appear in its place.

Performance

The performance data given represents past performance and should not be considered indicative of future results. Principal value and investment return will fluctuate, so that an investor's shares when redeemed may be worth more or less than the original investment.

Growth of $10,000: The graph compares the growth of $10,000 in a fund with that of a capital market index chosen by Morningstar and with that of the average growth for all funds in its Morningstar peer group. The index is an unmanaged portfolio of specified securities. The index and the category average do not reflect any initial expenses however the category average returns are net of ongoing fees. A fund's portfolio may differ significantly from the securities in the index.

Quartile Rank: The graph represents the fund's total return percentile rank among funds in the same peer group. The black bar on the graph represents the quartile in which the fund-performance ranking falls. If the top quarter of the graph is shaded, for example, the fund performed among the top 25% of its category that year.

Total return reflects performance without adjusting for sales charges but is adjusted to reflect all actual ongoing fund expenses and assumes reinvestment of distributions. Growth return is the percentage change in the scheme's soft close exit price adjusted for any capital re-organisation. Income return is the total return less growth return and reflects the level of distributions from a fund. For Australian funds, performance is not adjusted for taxation. For New Zealand PIE funds, tax credits are added back to the performance. For New Zealand non-PIE funds returns are calculated net of tax. Trailing returns for periods over one year are annualised.

Risk Measures

Standard deviation: Statistical measure of the volatility of the fund's return.

Sharpe ratio: A risk-adjusted measure calculated by using standard deviation and excess return to determine reward per unit of risk. The higher the Sharpe Ratio, the better the fund's historical risk-adjusted performance.

Alpha: A measure of the difference between a portfolio's actual returns and its expected performance, given its level of risk as measured by beta. A positive Alpha figure indicates the portfolio has performed better than its beta would predict.

Beta: A measure of a fund's sensitive to market movements. If beta is greater than one, movements in value of the fund that are associated with movements in the value of the benchmark tend to be amplified.

R-Squared: : Measures the relationship between a portfolio and its benchmark. It can be thought of as a percentage from 1 to 100. R-squared can be used to ascertain the significance of a particular beta or alpha. Generally, a higher R-squared will indicate a more useful beta figure.

Fees

Total Cost Ratio (Prospective): Represents the forward-looking figure encompassing the total non-discretionary fees and costs associated with managing and administering collective investment products.

Buy-Spread/Sell-Spread: A transaction cost incurred by the investor that reflects an estimated transaction costs incurred by the fund in dealing with the underlying securities as shown in the PDS.

Performance Fee Costs: Performance Fee shown in the "Fees and Costs Summary" table in the PDS. It is intended as a representation of potential on-going performance fee expenses and is a calculated average using the performance fee costs from the last five financial years (or as many as the performance fee was applicable). This amount includes the Performance Fee costs arising from Interposed Vehicles.

Investment Management Fee: The Management Fee (MIS) and Investment Fees (Super) shown in the PDS, that is attributable to investment management, which are fees and costs an investor would expect to be charged over the year. This excludes the costs arising from interposed vehicles.

Administration Fees and Costs (Super Funds only): shown in the "Fees and Costs Summary" table in the PDS. This includes OTC Derivative Costs deemed to be Administration costs.

Portfolio

Composition: The graph represents a breakdown of the fund's holdings into general investment classes based on surveyed data provided by the fund manager.

Morningstar Style Box: For equity funds the vertical axis shows the market capitalization of the stocks owned and the horizontal axis shows investment style (value, blend or growth). For fixed-income funds the vertical axis shows the average credit quality of the bonds owned, and the horizontal axis shows interest rate sensitive as measured by a bond's duration (short, intermediate or long).

Top Holdings: The largest exposure of eligible securities within a fund's portfolio. Portfolio holdings information is based on the most recent information available to Morningstar, and eligible securities are defined by Morningstar's Global Methodology team, and will exclude positions not considered core to the portfolio.

Top 5 Sector Weightings: The Morningstar sector structure divides the stock universe into 129 industries ranging from semiconductors to medical equipment. These industries are classified into 41 industry groups, which are then used to construct 12 separate sectors.

Top 5 Countries: The largest geographical exposure of a fund's stock assets. Country assignments are based on the primary exchange where each stock is traded.

Operations

Minimum Initial Investment: The smallest investment amount accepted by the product to establish a new account.

Minimum Additional Investment: The amount required to make subsequent investments in the product.

Minimum Withdrawal: The smallest amount that can be taken out of the product at one time.

Switching Allowed: If it's possible to switch between investments in the same offer document.

Distributions Frequency: The number of times per year a fund intends to distribute for the life of the offer document.
